EQ: How can you describe an objects position?

Procedure:

1) Sit across from your partner with a divider in between you.
2) One partner, "the builder," uses the blocks to make a building. Make sure the other partner, "the copier," cannot see the building.
3) The builder tells the copier how to make the same building. Make a list of the words you use down below in the box.
4) Remove the notebook and see if the buildings are the same.
5) Switch roles and do it again.

Words That We Used to Describe
ex. on top of

Draw Conclusions (Tell What You Learned)

What words did you use to describe your building?

Could you describe the position of each block without comparing it to the other blocks around it?
