

GRO FEATHERWEIGHT

The GRO Featherweight system is a novel solution for projects that have weight constraints or value-engineered (VE) budgets. The engineered soil composition is slightly higher in organic additives than typical extensive systems, to allow a sufficient nutrient base in a thin profile. Irrigation is highly recommended for this system, to sustain unforeseen drought conditions.

DEPTH	2.5"
SOIL	2"
DRAIN MAT	0.5"
SATURATED WEIGHT	17 psf
WATER RETENTION	0.6 gal/sf
IRRIGATION	Highly Recommended

*soil depths can be customized
