This product has been verified to comply with USDA national organic standards under 7 CFR part 205. 203(c)(3), 7 CFR part 205.105(a) and 205.105 (b). This product is intended for use according to an approved organic system plan.

GENERAL INFORMATION

Plant-X Bio-N is a "Plant Extract Tea". Rather than using compost or animal wastes, BioGro has taken live plants and specific plant parts and "steeped" them in various media solutions. The resulting solutions are allowed to ferment under controlled conditions and stabilize.

Plant-X Products actually have a long shelf life and can be stored under proper conditions for 1-2 years. Plant-X Products do not smell "rotten" and should not be used if they do.

DIRECTIONS FOR USE

Mixing Directions - Be sure spray tank is thoroughly cleaned, fill 1/3 full with clean water, add product and continue filling with agitation.

Compatibility - Plant-X Products are compatible with most fertilizers and bioproducts. Consult your BioGro dealer for more information.

When applying Plant-X Bio-N to crops, a soil deficiency must be first documented by testing.

SUGGESTED APPLICATIONS

Optimum rate of application will vary between fields depending on soil and/or climatic conditions, stage of crop growth and size of plants. The best timing is at planting or when a root flush is occurring. Consult your BioGro dealer for specific recommendations.

All Field & Vegetable Crops - Apply 1-5 gallons per acre at planting. Water run 1-5 gallons per acre during germination. Water run 1-5 gallons per acre with applied fertilizers during growing season. - Apply 2-5 gallons per acre in spring and fall during root flush.

Fermented Plant Material

WARNING

H315: Cause skin irritation.
H319: Causes serious eye irritation.
