

CHB 0-40-0

0-40-0 Guaranteed Analysis

Available Phosphate (P₂O₅)40%

Derived from Phosphoric Acid

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS:

Yeast and soybean meal

GENERAL INFORMATION

CHB 0-40-0 is a nutritional supplement comprised of orthophosphate fertilizer and a plant based additive to promote rooting in crop production.

CHB 0-40-0 is designed as an acidifying agent to lower the pH of irrigation water.

DIRECTIONS FOR USE

Applications Directions - Inject into irrigation water at rate determined by water analysis and on site pH readings.

Compatibility - CHB 0-40-0 should not be tank mixed with any other fertilizers unless specifically recommended. Mixing with high pH fertilizers can cause a hot and violent reaction.

Applications - CHB 0-40-0 can be applied by injecting into flood, drip or overhead sprinkler irrigation systems.

SUGGESTED APPLICATIONS

On all crops for fertigation - Inject into irrigation water at a rate determined by a complete water analysis and/or a buffer curve. Consult your qualified Bio-Gro representative. When using high rates avoid direct contact with living plant material or ensure an adequate volume of water to dilute the product on the plant surface. Continue irrigation after application to completely flush lines and maximize nutrient distribution.

After 20 minutes of injection, it is recommended to test the pH of the water. Do not adjust irrigation water to a pH of less than 5.0.

CONDITIONS OF SALE

Seller and/or manufacturer warrants only that this product consists of the ingredients specified on this label. No one is hereby authorized to make any warranty and/or guarantee concerning the use of this product. Being that the use, timing, placement, rate, application and other conditions are beyond the control of the seller and/or manufacturer, the seller's and/or manufacturer's liability for handling, storage and use of this product is limited to replacement of product or refund of purchase price.
