

# NexGen Reusable Water Bladder

## Multi-Purpose Liquid Storage

The NexGen Reusable Bladder is an innovative solution that solves many potable water storage challenges. The system incorporates a rigid outer shell constructed of PVC for superior tear and puncture resistance. The disposable inner liner is made of food grade material designed specifically for potable water storage. Each bladder kit contains 1 rigid shell, 1 inner liner and tap.

With the NexGen Reusable Bladder solution, sterilization of your potable water bladder after use is no longer an issue. Simply replace the inner liner after any deployment to maintain food grade quality even during long term storage. This makes NexGen an ideal solution for state and local governments, fire departments, hospitals or any other emergency response organization responsible for providing potable drinking water to a population. It is easy to store, quick to set up, simple to clean and requires no ongoing maintenance.

Specifications	
Capacity	500 Gallons
Filled Size	6'6"x6'6"
Stored Size	14"x14"x27"
Dry Weight	26 lbs
Outer Layer	PES 1000 Den PVC
Inner Layer	LLDPE (FDA Compliant)
Connector	2" PVC tap
Warranty	10 year - outer shell
	3 year - inner liner
