

How much does a healthy hoof grow in a month?

How many teeth does a mature female horse have?

What horse classification has a unique gate that results in a smooth and comfortable ride?

What is another term for Laminitis?

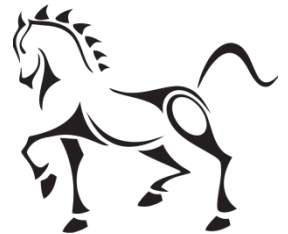

What body color is a uniform mixture of white with black hairs, with darker head and legs, and the color does not change with age?

Want to Learn More About Horses?

The Jeffco Horsebowl team is starting a new season!

Learn a wide range of knowledge as it relates to the horse – science, feeding, diseases, horsemanship, and more! Whether your goal is to do well on the written test at State or County fair, prepare for written tests for 4-H advancement leveling, or just want to know more about your horse, we welcome you to join the Jeffco Horsebowl Team!

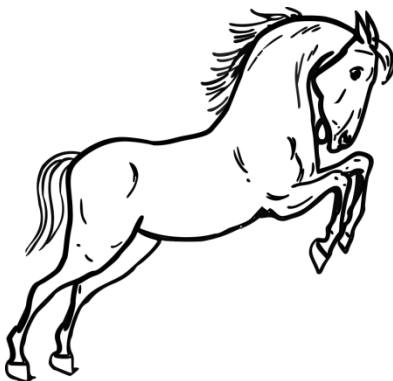

What is Horsebowl? Horsebowl is a knowledge bowl competition that tests participants knowledge on a wide range of topics as an individual and as a team. Our team has a relaxed atmosphere for members of all levels to participate as we study our materials, and practice through rounds of questions. We typically host two practices per month during the spring months.

When do we compete? In the spring, several counties host practice competitions for Junior and Senior members. State conference in June 2017 hosts the state competition, which is a competition for senior 4-H (ages 14-18) members.

Our 2016-2017 practice schedule will be announced. There are usually contests in the spring for Junior and Senior members.

To join the email list and be notified about practices, please email Staci Striegnitz, coach, at Anastasia.striegnitz@gmail.com

Answers to the Sample Questions Above: 3/8-1/2 inch; 36 teeth; Gaited horses; Founder; Blue Roan
