

Company Overview

illusive networks is pioneering deception-based cybersecurity. Its patent pending Deceptions Everywhere® technology neutralizes targeted attacks and Advanced Persistent Threats (APT). By creating a deceptive layer across the entire network — every endpoint, server, and network component - with an endless source of false information, illusive networks disrupts and detects breaches with real-time forensics and without interrupting business.

illusive networks' new *Attacker View* is a sophisticated breakthrough technology that enables enterprises, for the first time ever, to visualize attack vectors in real time. When combined with the Deceptions Everywhere® technology, illusive networks offers the most effective method of deceiving Advanced Attackers and stopping APTs.

Fast Facts

- Total funding to date: \$30M
- Headquarters in New York City and Tel Aviv
- R&D based in Israel
 - Team comprised of former IDF Unit 8200 leaders, researchers, and software developers with state-level and corporate security expertise
- Deployed at leading financial institutions, retailers, law firms, healthcare providers, as well as insurance, energy and telecommunication companies
- Five patents submitted for security deceptions
- 100% channel sales strategy

Company History:

- Series B Round \$25M led by NEA, October 2015
- Series A Round \$5M and official launch, June 2015 ([details here](#))
- Founded in September 2014 by Check Point Software Technologies veteran Ofer Israeli and cybersecurity foundry [Team8](#)

Awards and Recognition

- HPE ArcSight Certification - May 2016
- [Cybersecurity Excellence Award](#) “Best Startup” (under 100 employees) - April 2016
- Worth Magazine [12 Companies that Could Change the Cyber Equation](#) - April 2016
- Finalist, [MIT Sloan CIO Symposium Innovation Showcase](#) - April 2016
- CRN [25 Coolest Network Security Vendors](#) - March 2016
- Finalist, [RSA Conference Innovation Sandbox Contest](#) - February 2016

- Tracy Pallas, VP Channel Sales and Strategy [2016 CRN Channel Chief](#) - February 2016

Leadership Team - <http://www.illusivenetworks.com/about>

- Shlomo Touboul, CEO

Recognized internationally as a thought leader, Shlomo has both founded and served as an advisor to several cybersecurity companies. He founded Shany in 1985, a leader in Application Management products acquired by Intel in 1994. Prior to that, Shlomo led the network management business unit of Intel and left to found Finjan Software in 1996. Shlomo is named as inventor on a number of Finjan patents covering behavior-based technologies for identifying and deflecting malicious code from accessing endpoint devices across networks and the internet.

- Ofer Israeli – Founder & VP R&D

Prior to founding illusive networks, Ofer was a team leader at Check Point Software Technologies, where he led the “Endpoint Security Management” and the “Cloud and Document Security Management” teams. Earlier in his career, Ofer was a Research Assistant in the Atom Chip Lab focusing on theoretical Quantum Mechanics. Ofer holds B.Sc. degrees in Computer Science and Physics from Ben-Gurion University of the Negev.

- Hanan Levin – VP Products

Hanan has over 18 years of experience in delivering innovative, market leading, and award-winning global enterprise security solutions. He served as VP of Product Management at ForeScout, which was acknowledged by Gartner as a market leader, and the most innovative Network Access Control solution. Prior to ForeScout, Hanan was part of the team at Check Point that developed the Firewall- 1, VPN-1 and Provider-1 products. Hanan holds an MBA and B.Sc. in Computer Science, both from the Hebrew University of Jerusalem, and served as a Major at the Israeli Air Force.
