

Using Learningapps.org

This is the landing page. From here, you can create an account and click on any of the images for an example.

Click to logon or to create an account.

Click any image for an example.

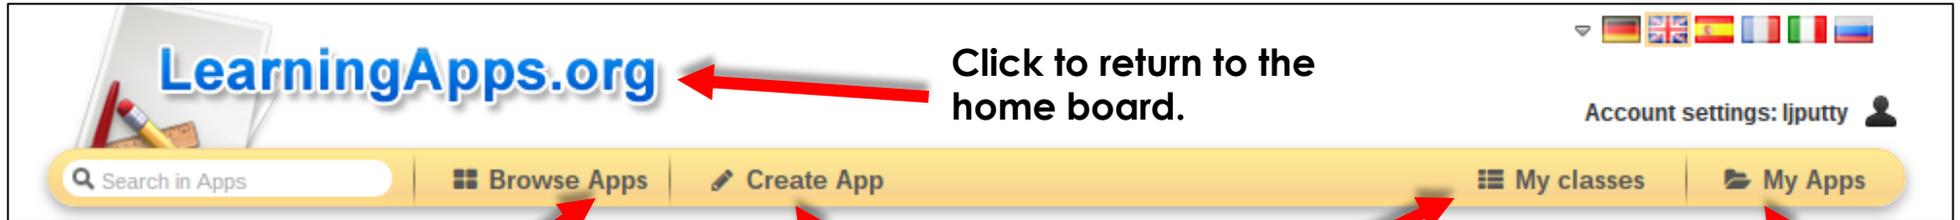

Once you've clicked on an image for an example, you may need to click Example 2 or 3 to see one in English.

This box tells the students what to do. In this case, they will watch a film, and fill in a cloze reading passage.

When they finish, they will click this to check their answers.

To create a unique app for your classroom from the example, you can select "create one like this," and follow the prompts to customize it for your classroom.

Click to return to the home board.

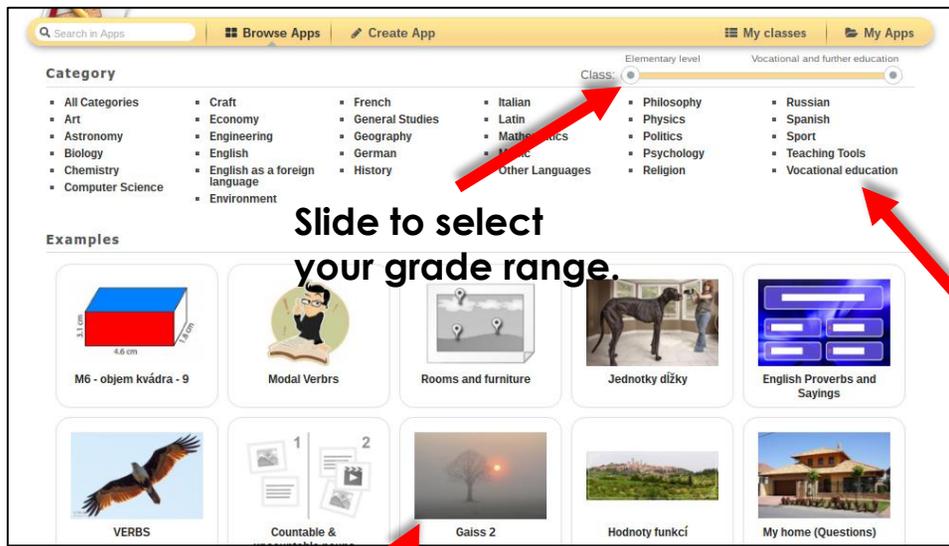

Click to browse apps that are already created and ready to use.

Click to create a unique app to suit your needs.

Click to access your classes if you choose to create them.

Click to access all of your apps.

To Reuse Already Created Apps:

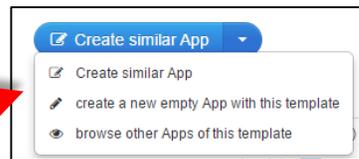

Slide to select your grade range.

Click to Select the subject area you are looking for.

Click the app you'd like to use.

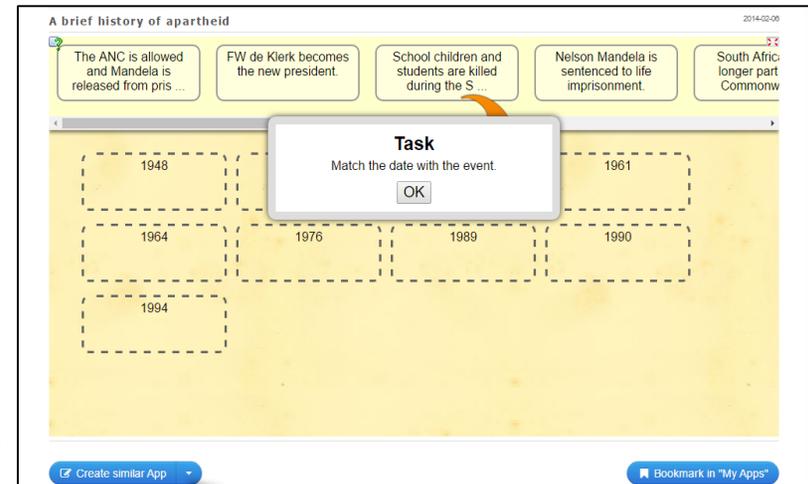

Create Options

Share Options

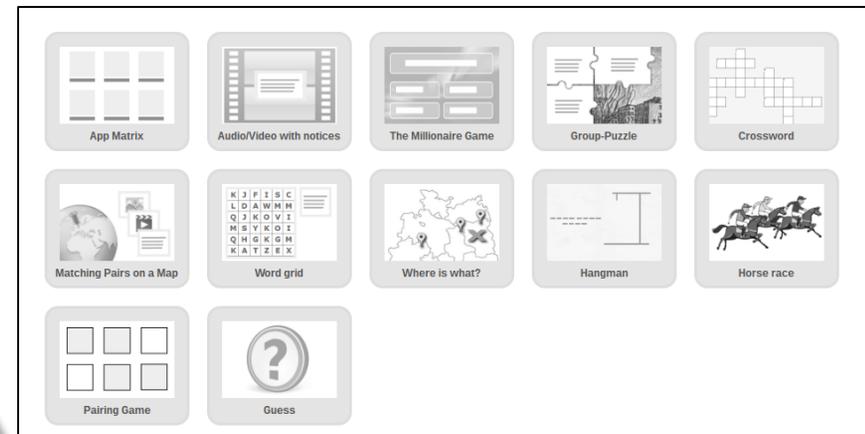

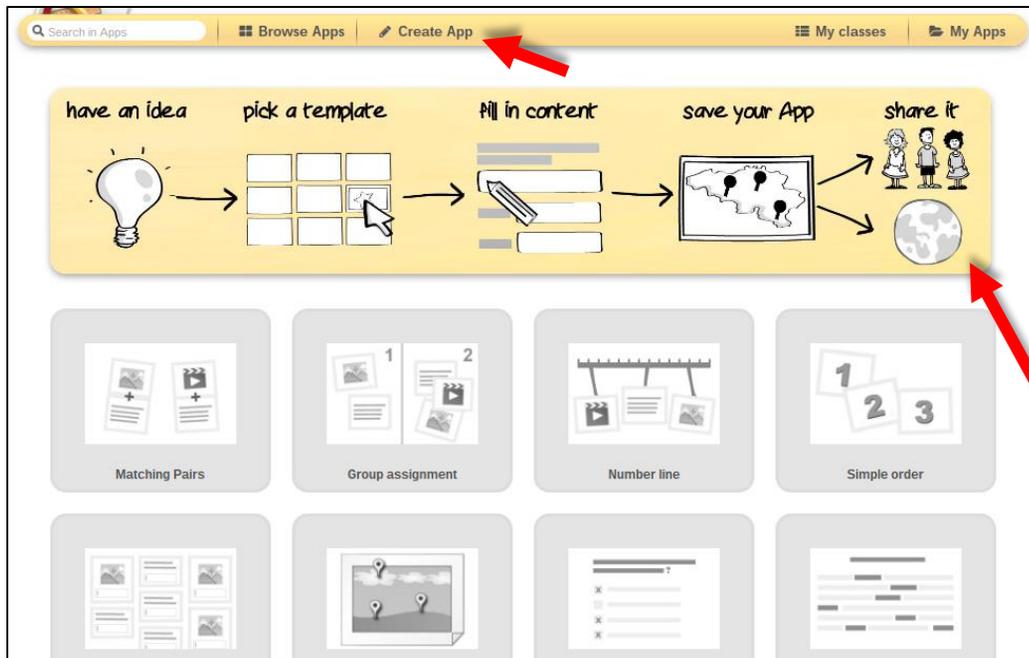

I could simply reuse this timeline of apartheid...

Or I could create a similar one by selecting this drop down.

To Create Unique Apps From Templates:

From “Create App,” select a template, and follow the prompts. There is a visual explanation right above the templates.

Add your content right in the box prompts.

App title Display language ?

No title yet

Task description

Provide a task description for this App which is shown on start up. Otherwise leave it blank.

Task type

Select the type of task. You can choose between selecting given words for each cloze or writing words into fields. If you have chosen Write in for task type you can select whether inputs are case sensitiv or not.

Task type:

Report copyright or misuse
