

Stage Size
Min. 5m x 4m, height 3.5m

Live Visuals (optional)

Depending on the contract we play with live visuals - in this case we need an installed and tested projector (but no screens).

The projection needs to cover the entire front of the stage. Please provide a projector that works and is powerful enough. We will connect to the projector using a VGA, DVI or HDMI connection. On bigger stages the live visuals are performed from stage left, on smaller stages from the FOH. Please preview some space and a table for the VJ. We are used to play on all kind of different stages. Please contact us in time to solve any problems.

We like to have a minimalistic lighting. 3 well focused profiles are usually enough. Also some small deco-lights or some nice backlights are very welcome.
