

About the project

Nowadays the learning activities are no longer related to the traditional face-to-face classroom training and the second language trainers need to adapt to these different settings. Technology is changing the way our society works. It offers us new opportunities and gives us access to sources we could have never imagined before.

Unfortunately, our education system is not flexible enough to apply all these free opportunities. In most of the cases it is very hard for trainers to **adapt their teaching plans to their learners' needs. Many trainers find they** do not have the necessary skills or time to adapt material to different methods of learning.

This project aims to solve these problems by creating a reference guide for language trainers that will help them to acquire or improve their ICT skills.

The guidebook will show language trainers in a simple and understandable way how to effectively apply modern technology in their training thus providing a more diverse range of learning options.

As a result of the project, trainers will acquire new skills for creating more flexible training strategies based on the usage of digital learning tools. This will be a valuable addition to their skill set and enhance options for career development.

1. Online Catalogue compiling the most relevant digital learning **tools in partners' countries**
2. A didactical and a technical report of the tools in the online catalogue
3. 5 examples on how to use the tools for language training
4. First testing stage
5. 5 new tools for language teaching
6. Second testing stage
7. Final online guidebook

Project partners

First partners meeting

Iberika Group (coordinator), based in Berlin since 1996, is a private non-profit education provider with many years of experience in language teaching and European projects management.

Danmar Computers LLC (Poland) is a private company operating in the field of IT and providing vocational training in this field.

RUNI Center (Bulgaria) founded in 1996 is an educational center working in three main fields – formal education, non-formal education and working on national and international projects.

Active Citizens Partnership (Greece) is an NGO with extensive experience to design and support programs that address contemporary training and social needs at national and European level.

Dacorom CVS (working name Community Action Dacorom) (UK) is an NGO which delivers at a local level a range of services to meet the needs of local community groups and individuals.

The first partner meeting under MALL GUIDE project took place on the 15th and 16th October 2015 in Berlin, Germany. During it partners were introduced to the general concept, aims and the results that are going to be produced within the project. The participants in the meeting discussed the development of the intellectual outputs, especially the first three of them. The working plans for the preparation of those outputs were defined and partners distributed their specific tasks and responsibilities. It was decided that the next partner meeting will be in Greece on 13th and 14th April 2016.
