PODXpress is a platform to manage POD, Delivery Information and Billing to Shippers.

It is a combination of Cloud Technology and Mobile Solutions specifically designed to reduce the turn-around-time experienced in the process cycle leading up to the final closure.

How things work?

Users can define delivery orders from several sources (WebXpress or 3rd Party ERPs or Excel upload).

This data is instantly made available to delivery agents to not only manage their movement

Why do you need PODXpress?

Visibility and Tracking is key for success in the industry of high service expectations

Many e-com companies would want to talk to many LSPs that they share in common

Issues such as COD, Billing and Freight Audit are very difficult to deal with manually

WebXpress
Visibility for supply chains

Welcome to the world of WebXpress brought to you by ECFY Consulting Pvt. Ltd.
With over a decade of depth in the logistics industry we know what makes movers move.
Our solutions cater to all sub-domains be it movement, storage, or planning.
