WebXpress
Visibility for supply chains

Fleet Management System

Welcome to the world of visible supply chains.

About WebXpress FMS

The global logistics industry is characterized by high costs of operations, low margins, shortage of talent, infrastructural bottlenecks, demand from clients for investing in technology and providing one-stop solutions to all their needs, and consolidation through acquisitions, mergers and alliances.
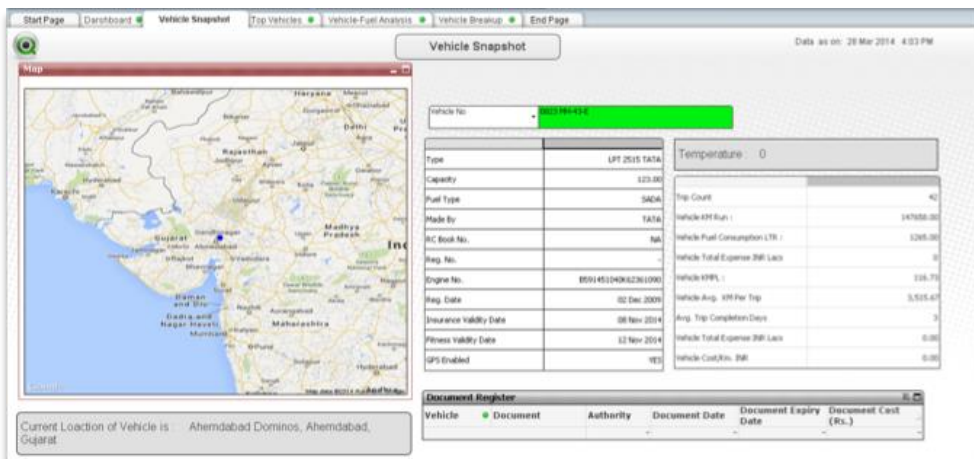

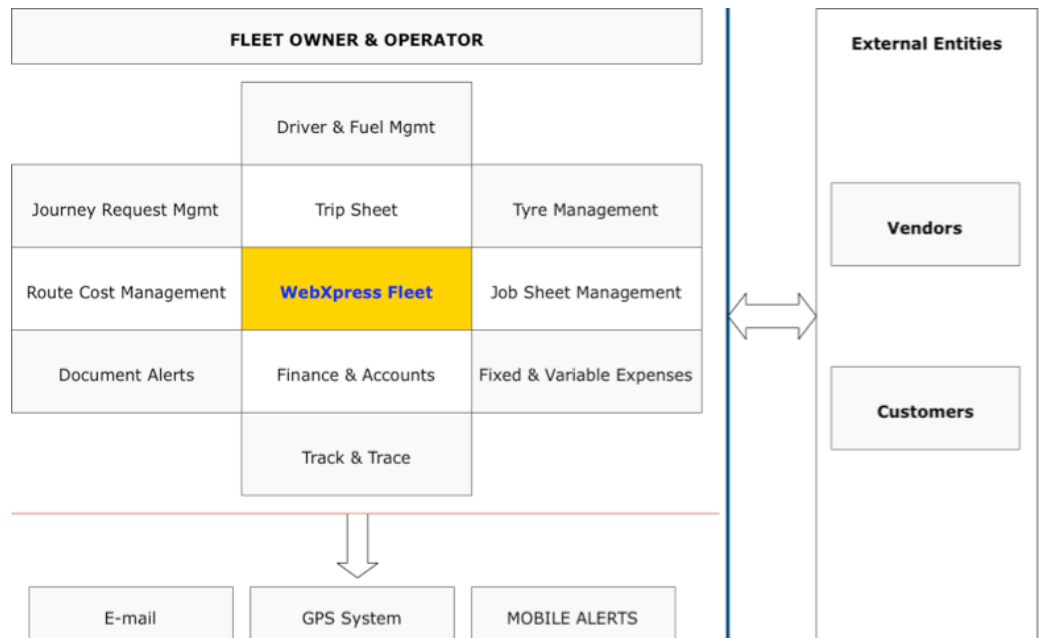

WebXpress FMS is a web based tool to help customer gain real time visibility across their Fleet hubs and can be integrated with GPS service providers for tracking at customer order level.

Most countries have Transporters or Fleet companies that own large number of fleet to service their network efficiently and timely and require control on attached or market vehicles also. Thus requires control in operations and visibility across chains of fleet.

WebXpress Fleet Management System helps to manage all the activities from trip sheet, driver settlement, fuel tracking, TAT of vehicle, tracking, billing to attach and financial control over fleet hub. It can be integrated with ERP to provide a seamless solution.

FMS Architecture
The processes that are part of the FMS solution

FLEET OWNER & OPERATOR

	Driver & Fuel Mgmt	
Journey Request Mgmt	Trip Sheet	Tyre Management

WebXpress BI enhances the functionality of FMS with our advanced reporting tool that assists in making decision

Successful Deployments

WebXpress FMS is deployed for over 3000 fleets across locations. WebXpress is used to manage operations and financial activity of some of the most respected names in the industry. WebXpress closely works with Transporters, fleet companies and end user to provide a highly integrated solution.

FMS Testimonials

Agility is a strong believer of technology enabled supply chains. We have thus implemented an online FMS - WebXpress.

We have closely worked with WebXpress team to integrate GPS status of vehicles at Consignment and Trip Sheet for visibility to our clients with their logins.

WebXpress FMS is also integrated with Agility's Finance System for real time posting of data.

We are now using WebXpress for over 3 years and look to expand its usage across our locations.

Mr. Prashant Bhong
Agility Logistics

WebXpress has helped Ritco manage multiple business segments and provided innovative solutions.

WebXpress managed multiple business needs of Ritco from Full Truck Load to Parcel to Fleet Operations.
WebXpress also has an integrated accounts system that helps to get a SINGLE picture of business to management.

Ritco has found WebXpress a key to its business growth and profitability. WebXpress is the best solution for any transportation firm with a long term view.
