The 500 Dollar Budget in Thailand

Many people that come to Thailand come in thinking, I can do this cheap because everyone says so and then proceed to blow every dime in a week. Stop it is very easy to live here for 500 dollars a month or I have done it on 300 before just to see if it can be done, it can. The trick to all this is saving money and self-control. This will be a guide and a kind of step by step of living in Thailand on a budget.
