

BeeLine Reader

INDEPENDENT RESEARCH SUMMARY

San Bernardino City USD's Early Reader Study showed over 50 percent reading fluency growth in just one month. The BeeLine class significantly outperformed the control class, with students at all levels of the BeeLine class showing greater improvement than their peers in the control class.

FLUENCY

50%

GROWTH

BeeLine also improves reading comprehension. In a study at Cicero USD (outside Chicago), fifth grade students greatly exceeded MAP expectations. Instead of the expected 2.5 point increase, the BeeLine students increased their comprehension scores by 9 points—more than 3x the expected growth.

COMPRE-
HENSION

3x

GROWTH

Literacy nonprofit Bookshare asked SPED teachers to evaluate BeeLine Reader with students who have dyslexia, ADHD, and other LD. The teachers unanimously reported that BeeLine Reader improved their students' reading abilities, as well as their attitudes toward reading.
