

Statement from the family of Berta Caceres:

We are devastated by the loss of our fearless Bertita. She was a leader who fought on behalf of human rights and the environment, and spoke truth to power. We ask the international community and human rights organizations around the world to put pressure on their leaders to bring about justice. Her murder is an act of cowardice that will only amplify Bertita's message to bring about change in Honduras and make this a better, more humane world.
