## **Building Equations** with a Variable on One Side Instructions: 1. Choose a variable, and assign a value to it. 2. Perform (at least 4) operations to form an equation. 3. Write each of your equations on a sheet of paper along with the rest of your group. **Equation B Equation A** Equation C **Equation D**

## Instructions:

- 1. Ask other students to provide you with equations they created, and write them in the spaces below with the name of the creator.
- 2. Solve each of the equations.
- 3. Check your answers with the person who created the equation.
