

Financial Accounting System

Welcome to the world of visible supply chains.

About WebXpress FAS

In today's highly competitive world, simply delivering a solution to your customers is not the aim – it is to do so with a decent profit margin.

For this, you need to understand all possible leakages, forecast them, and prevent them.

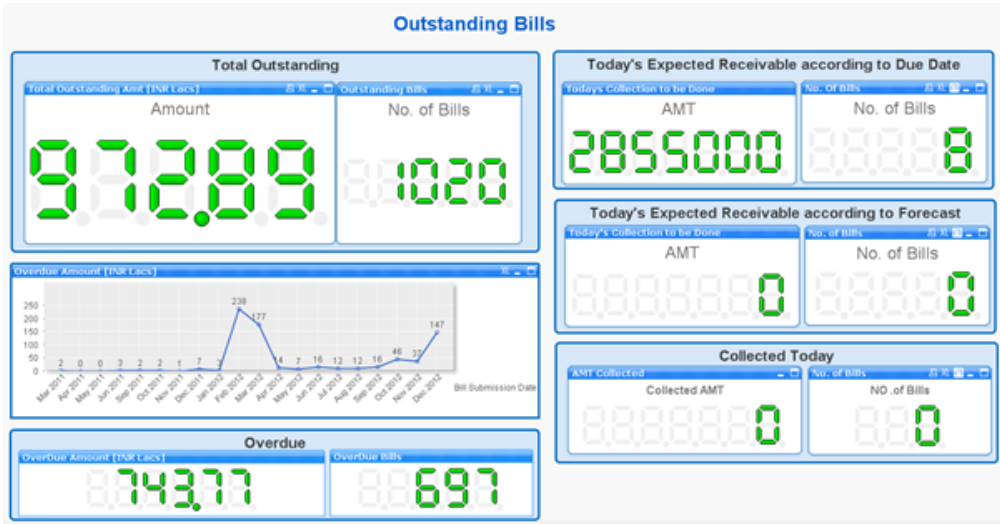

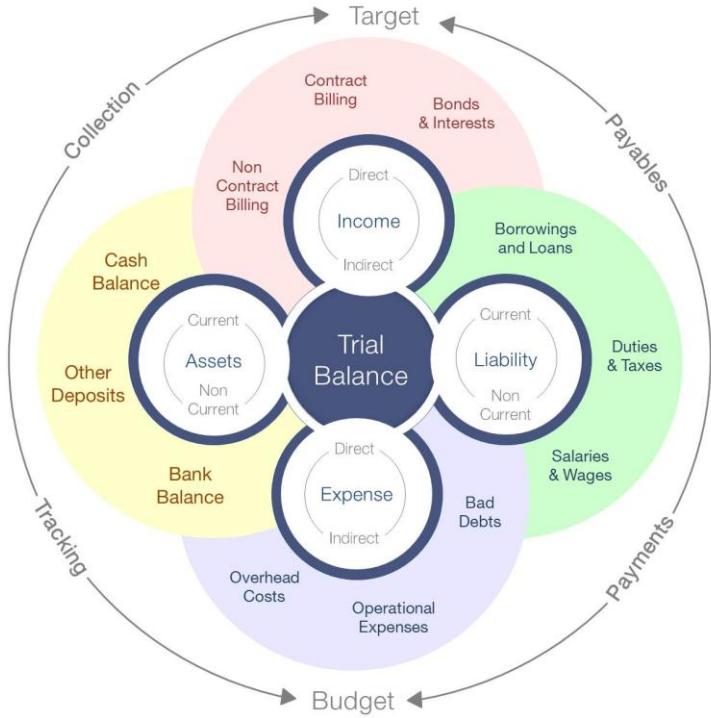

At the same time, you need to discover which part of your business is the highest grosser and nourish it to gain a competitive edge.

WebXpress FAS is a web based tool to help customer gain real-time understanding of your entire revenue cycle. Deeply integrated with the WebXpress Suite it is capable of delivering all your financial documentation from P&L, Trial Balance, Balance Sheet and much more.

WebXpress Financial Accounting System helps to manage all the activities from COA to categories, account groups, ledgers (both system populated and manually managed). FAS provides highly accurate documents such as: Cash & Bank Balance, General Ledgers, Trial Balance, P&L Statements, and even Balance Sheets. *Over 70% accounts are done using Intelligent Auto Posting.*

FAS Architecture

The elements that are part of the FAS solution

Business Intelligence

WebXpress BI enhances the functionality of FAS with our advanced reporting tool that assists in making decision

Successful Deployments

WebXpress FAS is deployed at more than 20 major logistics companies. WebXpress FAS is used on a daily basis to reflect customers' operational activities into financial implications. Many of our customers use FAS on a daily basis to take financial decisions in the long term. WebXpress closely works with Transporters, fleet companies and end user to provide a highly integrated solution.

FAS Testimonials

WebXpress has helped FSC in the most useful of areas. The ones under consideration are Cash Flow and Accounts Management.

When it comes to Petty Cash management, WebXpress provides the ability to multiple users and branches, hence collaborating work.

After an experience of a plethora of systems FSC feels that WebXpress is the simplest for its ground staff. They do not need any special training in finance to get going.

FSC Logistics

Delivering a superior service comes at a price. Though Vega maintains a highly competitive pricing. In order to manage in this industry, it has to reduce its Operations Cost. WebXpress FAS provides Vega with this ability.

Another area provided by WebXpress is Real-time Visibility towards all expenses and incomes.

Finally, for areas such as Fund-flow and Working Capital management, WebXpress FAS has proved to be a very useful tool.

Vega Logistics

WebXpress Customers

WebXpress Partners
