Summary

A seasoned professional with 8+ years experience in building software for web and mobile. Worked with product startups, corporates, consulting firms and successfully delivered applications for SAAS, E-Commerce and lifestyle businesses.

Work Experience

Architect, platform lead

APRIL 2015 - PRESENT

Aleena Ecommerce Pvt. Ltd.

I place myself at the intersection of our evolving business model, product efforts, daily operations and our business goals to effectively plan, coordinate and lead product design, delivery and tech operations.

Highlights

- Helped design the UI/UX for customer facing and internal applications of our e-commerce services
- Managed application development with a team of 4 developers using Agile/scrum
- Delivered platform features and processes to increase our operational capacity by 300% in 1 year
- Designed and developed a scalable and reusable architecture for our logistics platform
- Delivered 6 production quality applications on a tight deadline of 7 months

Technical co-founder

JANUARY 2014 - APRIL 2015

Grand Legacy Pte. Ltd.

Grand Legacy builds products for parents - to solve the many challenges that come with the job. From sharing your child's memories with close ones to leveraging today's technology to help with children's education. I handled the following work, completely as a one man shop, while the founder focused on business aspects of the company.

Highlights

- Delivered a beautifully designed, simple Android app where parents can read one useful article a day. This was part of an initial launch strategy for Grand Legacy platform
- Design - UI, app architecture
- Product planning, development and release management
- Brainstorming/implementing marketing/advertising initiatives

-

UI Lead

JUNE 2011 - DECEMBER 2013

Fisheye Analytics Pte. Ltd., Singapore

Frontend design and development for all user facing applications at the company. Includes company website, main product, and other secondary products.

My work

- End-to-end UI/UX design, brainstorming with stakeholders and implementation
 - Frontend projects management and delivery
 - Application development, deployment, testing & maintenance
 - Worked with Flash Builder, Actionscript 3, HTML5/CSS3, Java/JSP/Servlets, MySQL, Phonegap and Sencha touch
-

Earlier work

Freelance

OCT 2008 - JUN 2010

Worked as a remote freelancer developer for many web design agencies, during my education. Technologies involved Adobe Flash with Actionscript 3, HTML/CSS, Wordpress, Symfony PHP framework and more.

Member, technical staff at 24/7 Customer Pvt. Ltd.

JUNE 2010 - MAY 2011

Frontend development for a “smart” chat client. Handled application architecture design/development, deployment, testing and code reviews.
