

8 Port Distribution Manifold

The Filling Station™ is a clean water distribution manifold in an 8 tap configuration. Placed directly after The FW-1200 or any other potable water source, up to 8 lines of people can simultaneously fill containers.

Each food grade filling spout is removable, allowing you to direct water to other locations with any 3/4" garden hose.

The Filling Station is constructed of heavy duty stainless steel and stores in a rugged transport case.
