

WHERE IN THE WORLD

SUPPLIES

All you need is the supplied slides and a way to project them!

MODIFICATIONS

Have students play in teams, a great way to build camaraderie, or have students play individually, moving to certain areas designated to correspond to their responses.

HOW TO PLAY

Let's see who in your youth group is a future air traffic control officer! You will show the three-letter code for a certain world airport, and your students will have to guess which of the onscreen options best fits the code. Student or group with the most correct responses at the end of the game wins!

NEXT LEVEL

This game is begging for some props! Have each team make a "mascot" paper airplane or dress up like pilots to make this game even more memorable!
