Sight Words

Sight words are words that you see again and again when you read. This book is filled with the sight words **once**, **upon**, **far**, and **away**. Look for them in the text. Check the pictures, too!

Once upon a planet, near the galaxy's end,
one lonely alien longed for a friend.

At least **once** a week, he flew **far away** hoping to come **upon** a friend one day.

Once upon a planet, **far, far away**,
another alien played alone every day.

At least **once** a week, he flew **far away** hoping to come **upon** a friend one day.

Once **upon** two planets, **away** so far,
the two wished **upon** the very same star.

They both wished for a friend,
who wanted to play
upon planets near and **far, far away**.

Then, **once upon** a planet, **far, far away**,

I shall land
upon this planet
far, far away.

both aliens landed the very same day.

And **upon** that planet, **far away** from the sun,

those aliens met and had tons of fun!

Once upon a planet, near the galaxy's end,

two lonely aliens each found a friend!
