

Activate your digital product

The image shows a laptop screen with a dark gray background. At the top, the URL **minbokhylla.studentlitteratur.se** is displayed in white. Below it, the text **ACTIVATION CODE** is followed by a white rectangular input field. Underneath that, the text **ACTIVATION DATE** is followed by another white rectangular input field. At the bottom of the screen, the text **Valid for 2 years from date of activation** is shown in white.

Please observe that the activation code is unique. Once it has been used to activate the web resource, it will be connected to this specific user. The web resource is also connected to this particular edition of the book, and will – under normal circumstances – be working for at least two years from the day the code was first activated. Studentlitteratur does not, however, guarantee that the web resource will be working for more than five years after this edition of the book is no longer available for purchase. Also observe that technical interruptions due to maintenance work etc. may affect the availability of the website.
