Password: 11293#

Description:

Dr Carolee Johnson gives a very intriguing teleclinic on why the body requires the right type of salt in order to maintain optimal health.

Dr Carolee gives some very interesting history on salt being so important to people that it was actually used to pay wages for some people, and others were willing to risk death or a life of imprisonment rather than go without it.

She will discuss why a saltless diet is actually very dangerous to your body, and why.

She will discuss how to charge the brain, prevent kidney stones, regeneration of the kidneys and bladder, longevity, and how the right type of salt will actually cure hypertension, and much more. Don't miss this one!
