

*92 Jackson/Charvel
Guitar Catalog*

Jackson/Charvel

In 1978, Charvel introduced the first electric guitar specifically created for that day's style of hard driving rock & roll. It was the first time a company had built and designed a guitar exclusively for "Heavy Metal." Charvel Guitars became accepted as an instant success worldwide and we have continued to expand our influence into all types of music.

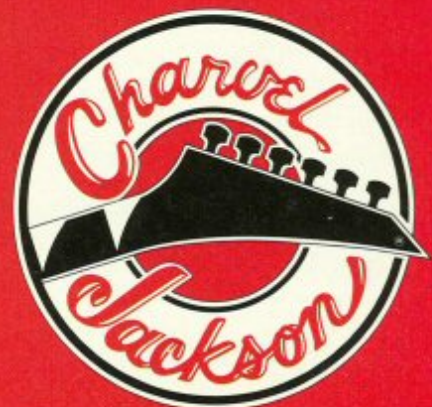

Beginning with our first *Soloist* and *Rhoads* guitars, Jackson/Charvel has helped to define the meaning of quality in the manufacturing of electric guitars. Through the use of superior materials and workmanship, we have continually set the standards by which quality musical instruments are judged.

Fourteen years later, we are not only continuing this tradition, but have greatly enhanced it to include a much larger range of instruments so that not only the professional musician can afford to own a piece of our growing legacy. By utilizing the most modern production technologies combined with traditional methods, we can now offer the same level of quality in all of our instruments, regardless of price.

No matter what type of music you play, there is a Jackson/Charvel instrument that can help your dreams come true. Don't just take our word for it, play one of our instruments and you will instantly know why legendary guitarist *Steve Cropper* has chosen our *Charvel Surfcaster* as the newest addition to his arsenal. You will understand why new, young players like *Marty Friedman* have chosen Jackson guitars to be their main instruments when you feel one of our ultra fast necks.

You are invited to your nearest Jackson/Charvel dealer for a hands-on demonstration of these remarkable instruments. Your dealer will also be able to provide complete details about the models in this catalog, as well as our *Custom Made Jackson* guitars.

We know that you will be able to hear and feel the difference.

Jackson

The commitment continues. Building on the success of the original *Professional Series*, Jackson has expanded the Pro Series with 14 new models for 1992. Jackson guitars have an established reputation for being the choice of *Rock* and *Metal Guitarists* around the world. With the addition of our new *Stealth* and *Infinity* guitars, Jackson performance and quality are now available to meet the demands of a wider range of musicians.

You have probably noticed many of your favorite guitar players endorsing other companies' products, yet when you see them live, they're playing *Jackson Guitars*. Ever wondered why? Maybe now is the time to find out.

Soloist

SOLOIST PRO

BODY: POPLAR
NECK: QUARTERSAWN MAPLE
FINGERBOARD: BOUND EBONY
SCALE: 25.5", 24 FRETS
BRIDGE: JT-590 DOUBLE LOCKING

CONTROLS: VOLUME, TONE, 5-WAY SWITCH
PICKUPS: (N) J-100VS, (M) J-100VS, (B) J-92C
FINISHES: PW, MB, DMB, DMR

Since the *Soloist* was first introduced, it has been responsible for changing the way modern electric guitars look. At the time of its release, there were only two accepted body styles on the market. If you take a look now, most guitars being produced owe their origin to the *Soloist*. It was the first guitar design to square up the edges of the body and extend the cutaways for better access to the upper frets.

Because of its neck thru body construction, the *Soloist* offers very even string response and exceptional sustain, along with unsurpassed solidness and rigidity.

NECK THRU CONSTRUCTION

JT-590 TREMOLO/ACTIVE PICKUPS

Rhoads

Designed in collaboration with the late *Randy Rhoads*, this uniquely shaped instrument is still the choice of "Metal" guitarists around the world. The *Rhoads* guitar was the first instrument produced to bear the *Jackson* name and it still remains as the flagship of our line. With its unique tone and solid feel, the *Rhoads Pro* has become one of the few modern guitars already acknowledged as a contemporary classic.

For 1992, we have introduced a new bolt on neck version to make the *Rhoads* more accessible to guitarists on a limited budget. The *Rhoads EX* has the same lightning fast neck shape and sonic roar as the original *Rhoads Pro*.

RHOADS NECK SPECS

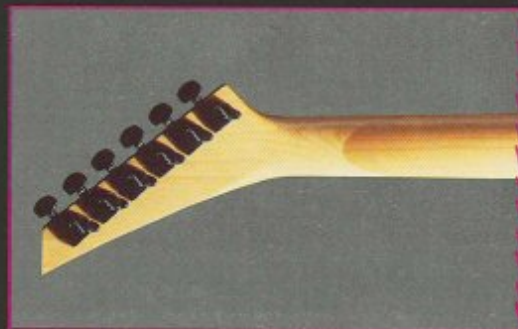

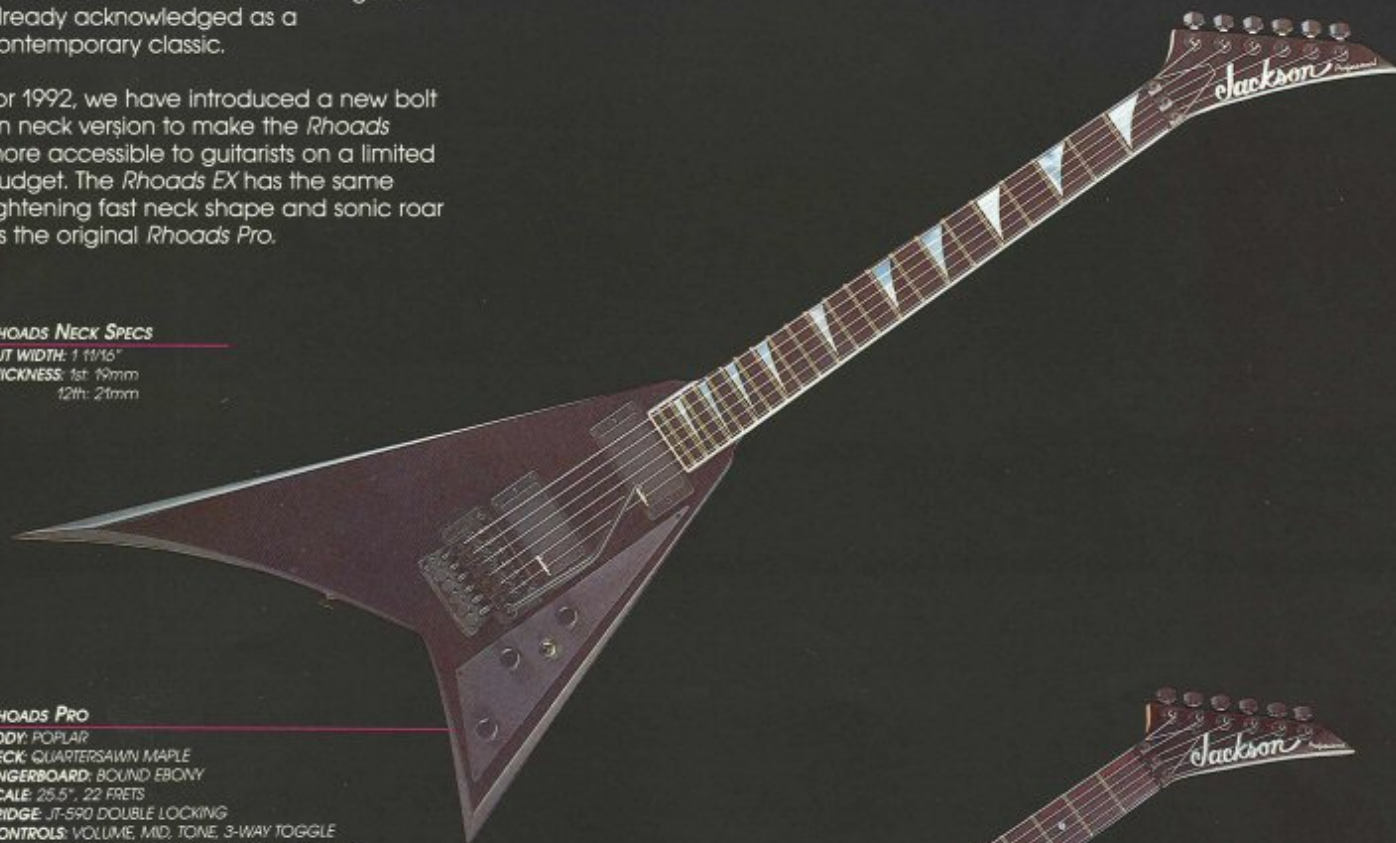

NUT WIDTH: 1 11/16"
THICKNESS: 1st: 19mm
12th: 21mm

RHOADS PRO

BODY: POPLAR

CONTROLS: VOLUME, 3-WAY SWITCH
PICKUPS: (N) J-50N, (B) J-50M
FINISHES: BLK, BR, CB, SW, STN

JACKSON SCARF JOINT

Infinity

The *Infinity Pro* can best be described as a modern classic. With its mahogany body, carved maple top and set neck construction, the sound of this instrument can best be described as warm and harmonically rich. Set neck guitars are well known for their midrange sustain characteristics, and the *Infinity Pro* is no exception.

The *Infinity XL* shares the same shape, but with a Basswood body and bolt on neck. The *Infinity XL* features a bound top and abalone dot markers to highlight its understated good looks. The pickups in both *Infinity Models* are specially wound to enhance the warm tone of this new body shape.

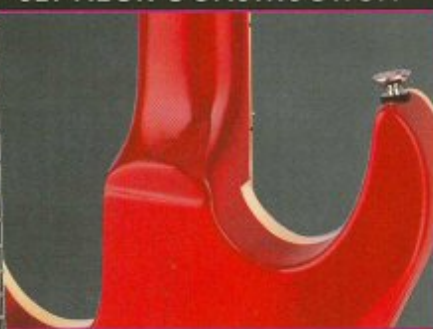

INFINITY Pro

BODY: MAHOGANY / MAPLE TOP
NECK: MAHOGANY
FINGERBOARD: BOUND ROSEWOOD
SCALE: 25.5" / 22 FRETS
BRIDGE: JT-590 DOUBLE LOCKING

CONTROLS: VOLUME, TONE, 3-WAY TOGGLE
PICKUPS: (N) J-50M, (B) J-92C
FINISHES: DMB, DMP, BLK, MG

ARCHED FLAME MAPLE TOP

Stealth

Take a *Dinky* body, sculpt the front and back so that you have an ultra sleek looking and feeling body, and you have the *Stealth*. The result is a light weight guitar with an extremely powerful sonic character. The *Stealth Pro* features an ebony fingerboard for aggressive mid range and highs, while the *Stealth XL* and *EX* models come equipped with a rosewood fingerboard for a warmer overall response. Either way, the *Stealth* is an amazingly comfortable guitar with a lot to offer any style of music.

STEALTH NECK SPECS

SLEEK AND SLENDER SIDES

Dinky

If you are a musician who demands the highest quality, most versatile instrument possible, the Jackson Dinky XL will surely meet your needs. A lightning fast, low profile neck with bound rosewood two octave fingerboard, mother of pearl sharkfin inlays, and Basswood body make these guitars the most attractive and versatile instruments available.

All Dinky models feature the same low profile neck shape with 24 highly polished jumbo frets. Our new J-100VS single coil sized humbucking pickups are used in all H-S-S models for high output single coil tonality without the usual 60 cycle noise.

DINKY NECK SPECS

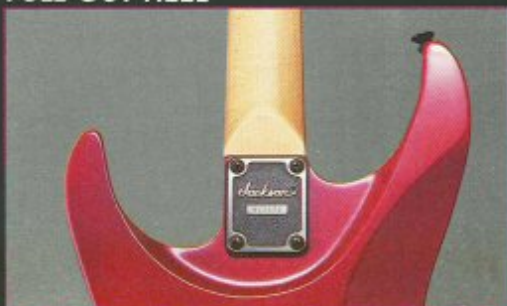

NUT WIDTH: 1 15/16"
THICKNESS: 1st: 17mm
12th: 20mm

Dinky XL

BODY: BASSWOOD

FINISHES: BLK, MV, CB, STN

Fusion

24 FRET, FULL ACCESS CUTAWAY JT-580 LOW PROFILE TREMOLO

Guitar players have long searched for an instrument that would combine the light string tension and percussive attack of a Les Paul with the overall brighter sound of bolt on neck guitars. Our answer to this quest is the *Fusion Series* of guitars. All *Fusion* guitars have a slightly reduced scale length, which gives these guitars their lighter string tension and percussive attack, and because they are bolt on necks, they have that brighter overall sound. This combination has become so popular that we offer our widest assortment of pickup combinations and features in the *Fusion Series*.

Fusion Neck Specs

NUT WIDTH: 1 11/16"
THICKNESS: 1st: 19mm
12th: 21mm

Concert

Previously only available as a custom order instrument, the *Concert Bass* has long been a favorite among bass players looking for a bass that not only looks great, but has a warm powerful sound. Based on our *Soloist* body shape, *Concert Bases* are well balanced and versatile enough in the tone department to be used for any style of music. The five string model offers an extremely comfortable neck that will not require you to adjust your technique in order to play it.

CONCERT NECK SPECS

SLEEK, LOW PROFILE DESIGN

Futura

KAHLER 2440/EMG PICKUPS

The *Futura Bass Series* offers today's working bassist a combination of features never found before in a professional instrument. Their beautifully contoured bodies and ultra fast necks have already made these basses favorites among serious players the world over. The *Futura Pro* features EMG pickups and a massive, fully adjustable Kahler bridge.

The neck thru body models can be ordered with either Australian Lacewood or Maple construction. The Lacewood is lighter in weight and has a somewhat brighter tone on the top end, while the Maple offers a bigger midrange tone. Both have exceptional low end response with extremely high definition of the individual strings.

HEEL-LESS BOLT-ON

Charvel

Charvel guitars have always been recognized for their innovation and quality. For 1992, our design staff has coupled these classics with a vast array of new features, all of which are designed to bring you maximum performance.

Never afraid to take a chance and try something new, Charvel released its new *Surfcaster Series* last year, and they have already been acclaimed as the first truly innovative instruments to be produced by any company in the last twenty years.

For an instrument that was originally intended for "Metal," Charvel guitars are now frequently found in the studios and on the stages of *Nashville*; not bad for a company that started in a tiny shop with two employees.

PICKUPS: CHANDLER (N) LST, (B) LST/RW
FINISHES: BLK, TRQ, MG, TR, TO, SGL

Surfcaster

The *Surfcaster Series* represents a dramatic step forward in the evolution of the electric guitar. They are a true hybrid of all the things that make vintage instruments desirable, merged with modern materials and construction techniques for reliability and uncompromising performance.

"Crisp, sparkling sound, visually arresting" were just a few of the good things Stan Cotey of *Guitar Player Magazine* had to say in his excellent review of the *Charvel Surfcaster*. Recreations of vintage *Lipstick Tube* pickups give the *Surfcasters* a clear bright tone which is unsurpassed for all types of music where a brilliant cutting tone is desired. The bridge on the twelve string model has separately adjustable saddles for spot on intonation. The six string tremolo model uses a roller nut and fulcrum tremolo for excellent tuning stability.

PUSH/PUSH TONE KNOB

ALL SURFCASTER INSTRUMENTS FEATURE A PUSH/PUSH SWITCH IN THE TONE KNOB. THIS IS USED FOR PHASE REVERSAL WHEN USING BOTH PICKUPS.

STX

For the guitarist who requires the drive and sonic flexibility of a modern instrument with the feel and shape of a more traditional guitar. The *STX Custom* and *Deluxe* both use our new stacked single coil size pickups for low noise and high output, while the *TX Custom* uses a reverse wound middle pickup to eliminate 60 cycle hum in the combination pickup modes. The new *JX Bass* has a reduced size body and neck shape that are designed for comfort and speed.

CX Series

Charvel has always been known for its ability to produce extremely high quality instruments at affordable prices. The new CX Series continues that tradition. Complete with many of the same features as our higher priced models, the CX Series offers a level of playability and sound usually reserved for instruments costing considerably more. Using the same neck shapes as our professional models, the CX Series offers playability second to none.

Glossary

HUMBUCKERS

- **J-50M**-Warm, classic tone with increased output.
- **J-50N**-Classic tone with slightly less output for smooth round tone.
- **J-55**-Delivers both chunky rhythm textures and rich round lead voice
- **J-75**-Mega output, hard edged with distinctive, grinding crunch.
- **J-80**-High output, smooth response distortion class pickup
- **J-85**-High output voltage with a nice fat midrange grind.
- **J-92C**-Smooth overdriven sound with a distinctive, crisp edge.
- **J-95**-High output with wide band response to produce chunky rhythm textures and a rich, round lead voice

SINGLE COILS

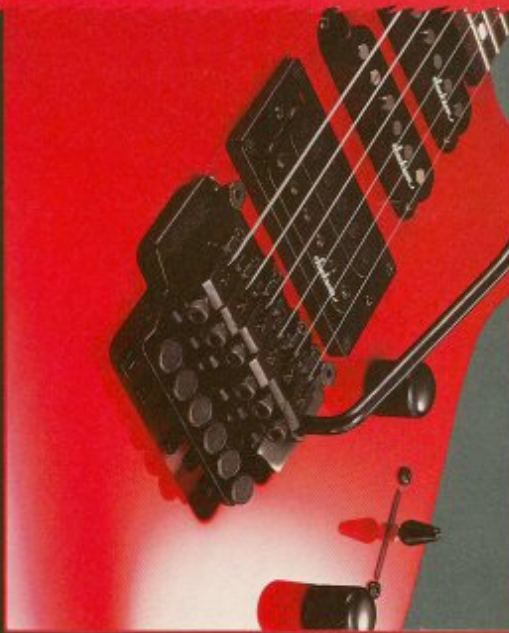

- **J-100**-Authentic vintage single coil modified staggered pole pieces to conform to contemporary fingerboard radius and more popular string gauges of today.
- **J-100RW**-Reverse wound, reverse polarity version of J-100 pickup.
- **J-110**-Original single coil sound clean overtones and harmonics
- **J-120**-Solid highs and overtones with extra lows and mids
- **CHANDLER LST** and **LST/RW**-Vintage re-issue of the lipstick tube pickup, low output 4.5SL and a high resonant peak greatly enhance sensitivity and dynamics.

SINGLE COIL HUMBUCKING

- **J-100VS**-Traditional single coil sound without 60 cycle hum.
- **J-200**-Low impedance with increased lows and mids.
- **J-200R**-Full size humbucker output in a single coil package.

BASS PICKUPS

- **J-20**-Split coil construction with increased output and mid range punch
- **J-25**-5-string version of J-20
- **J-30P**-Ceramic split coil pickup with enhanced middle and top end.
- **J-150VS**-Bridge position, warm tone with a tight bottom end.
- **J-160**-Bridge position ceramic single coil, clear defined sound through entire frequency range.

- BLK** – BLACK

GUITAR BRIDGES

- **JT-590**-Floyd Rose licensed double locking tremolo precision crafted in Germany. All parts interchangeable with Original Floyd Rose™ bridges.
- **JT-580**-Floyd Rose licensed double locking tremolo with machined steel baseplate and threaded arm.
- **JT-580LP**-Same specifications as JT-580 tremolo but with low profile fine tuners.
- **JT-490 W/ROLLER NUT**-High mass fulcrum tremolo with lock down saddles featuring roller nut for greater tuning stability.
- **J-390 W/TAIPIECE**-Tune-o-matic 2 point adjustable non trem with Charvel floating tailpiece.
- **J-370**-Non-tremolo 12 string bridge with 12 fully intonatable saddles. 6 strings load thru body while remaining 6 anchor at the bridgeplate.

- **J-380**-Flat mount non-tremolo string thru body featuring 6 fully adjustable bridge saddles.
- **JT-480**-Vintage style synchronized tremolo.
- **JT-470**-2 point vintage style fulcrum tremolo.
- **JT-570**-Floyd Rose licensed single locking tremolo.

BASS BRIDGES

- **JB-340**-Hi mass fully adjustable for string height and intonation.
- **JB-440**-Precision cast high density bass bridge with track mounted saddles.
- **KAHLER 2440** and **2450**-Advanced design features adjustable string spacing, height and intonation.

ELECTRONICS

- **JE-1200**-Active mid-boost guitar circuit. Boosts middle frequencies to fatten up and thicken for a bigger tone and added sustain.
- **JE-1500**-Active para-mid E.Q. guitar circuit. Use the tone knob to select the center of any group of frequencies from 450Hz to 45KHz This is a filter sweep very much like a wah pedal.
- **JE-2000**-Active E.Q. bass circuit. Bass and treble controls give ± 12 dB of boost and cut at 40Hz and 25KHz for incomparable sonic control.
- **JE-2500**-Active para-mid E.Q. bass circuit. This is the same basic circuit as the JE-2000 but designed for use with EMG-35P/J pickups.
