

*At Lancôme, we believe
that happiness is the most
attractive form of beauty.*

More than expert results, discover the “joie de vivre” of true innovation, inspiration, personalization and French elegance at Lancôme.

The freedom to choose your beauty in a luxury, sharing and friendly environment – be it skincare, make-up or fragrance.

The confidence of knowing that, for more than 80 years, Lancôme has been joyfully making women all around the world feel as happy and as beautiful as they truly are.

R

A

ACTYL C OR ACTYL P, P FOR PIGMENTATION (*INCI: 3-o-ethyl ascorbic acid*)

A derivative from Vitamin C more active, more stable and more bio-available than Vitamin C. It has a proven double-action on melanin. It helps inhibit the melanin precursors (tyrosinase: enzymatic reaction that leads to production of melanin).

ADENOSINE (*INCI: adenosine*)

Yeast derived ingredient that plays an important cell-signaling role in many bodily processes. Adenosine is present in our cells and functions as a cell-communicating ingredient because it is a source of energy that supports healthy cellular activity. Adenosine is associated with anti-wrinkle cosmetic results and skin-smoothing properties.

AHA (*INCI: vaccinium myrtillus fruit extract (and) saccharum officinarum (sugar cane) extract (and) citrus aurantium dulcis (orange) fruit water (and) citrus limon (lemon) fruit extract (and) acer saccharum (sugar maple) extract*)

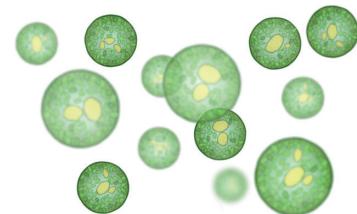

Alpha Hydroxy acid or Fruit acids. They are used as moisturizers, emollients and exfoliants according to the

concentration employed. They also treat photo-damage and hyperpigmentation for obtaining an uniform skin color. They reduce fines lines and superficial wrinkles thanks to their exfoliation properties and reduce the thickness of the stratum corneum. The most popular AHAs used in cosmetics are: lactic acid, malic acid, citric acid, tartaric acid.

ALGAE EXTRACT

(INCI: *algae extract*)

Brown, red algae extracts, natural origin. An active substance used to normalize the skin's moisture content and provide suppleness and firmness to the epidermis. Depending of the variety used, benefits to the skin can be anti-free radical activity and wrinkle reduction.

AMINO-ACIDS

There are 21 essential amino acids. Some amino acids are located in the stratum corneum. NMFs (Natural Moisturizing Factors) are made up of approximately 40% amino acids. They are the building blocks of protein. Used to enhance water retention & skin moisturization. Because of their reduced size, AA can penetrate deeper into the stratum corneum's cell layers than proteins, such as collagen, with a higher molecular weight.

ANNATTO (CI 75120)

Is a natural origin red colorant used in food coloring.

AQUATORYL (INCI: peg/ppg/polybutylene glycol-8/5/3 glycerin)

Reinforces penetration depth & speed.

AQUEOUS

Contains mostly water. E.g.: aqueous gel.

B

ARGININ (*INCI: arginin*)

An essential amino acid for proteins production such as keratin, the main constituent of (hairs and) lashes.

BAICALIN (*INCI: butylene glycol (and) scutellaria baicalensis root extract*)

Is a component of the traditional herbal remedy known as Chinese skullcap. It has antioxidant properties to fight against free radicals. Formulas with baicalin may even promote anti-ageing effects, thus contributing to the skin's overall quality and appearance.

BEESWAX (*INCI: cera alba*)

Is a natural wax produced by honey bees. One of the oldest raw materials used in cosmetics. It is traditionally used as an emulsifier for water-in-oil emulsions and is now used to regulate a formulation's consistency. It can help to bolster skin barrier function, may serve to improve moisture retention and provide hydration. It is credited of anti-inflammatory, anti-allergic, anti- oxidant properties. Depending on its source, beeswax can be considered a non-comedogenic ingredient.

BIO CELLULOSE

Bio cellulose support is a cool and soft highly advanced premium material obtained via biotechnology. It adheres to the skin like a second skin, to lock moisture and improve skin texture while ensuring your skin optimal comfort. Moreover, bio cellulose is well known for its soothing and regenerating properties. Its intrinsic anti-inflammatory properties have been clearly demonstrated.

BIOLYSAT (*INCI: bifida ferment lysate*)

Polyfraction of bifidobacterium obtained by ultrasound. One of the duos of probiotic fractions in **Advanced Génifique** Concentrate selected for its action on the improvement of the structure and defense of the epidermis.

BIO-NETWORK™

A replenishing complex of wild yam, soy, sea algae and barley, and Pro-Xylane™ to help fight skin dryness and visibly rejuvenate skin's appearance.

C

BLACK TEA FERMENT (*INCI: saccharomyces/xylanum/black tea ferment (and) glycerin*)

Black Tea possesses high concentrations of vitamins, minerals, essential oils, tannins, and polyphenols. Tannins and polyphenols, especially contribute towards the antioxidant properties in Black Tea skin care products. Additionally, black tea is known to provide soothing properties. Known for enhancing skin, radiance and color.

BUCKWHEAT WAX (*INCI: polygonum/fagopyrum*)

Helps reduce the appearance of puffiness.

CAFFEINE (*INCI: caffeine*)

Natural origin. Able to break down lipids, it has a lipolytic effect on fatty cells. Given this ability and its draining properties, caffeine is used for skin firming and tightening. Helps the skin microcirculation. It is also used to decrease puffiness.

CARNOSINE (*INCI: carnosine*)

Anti-yellowness & anti-greyness properties.

CENTELLA ASIATICA EXTRACT

(*INCI: centella asiatica extract*)

In traditional use, which goes back thousands of years, Centella asiatica has been known and used by the East Indians & the Chinese. This plant is also called “Tiger Herb.” It has soothing and anti-irritating properties. Anti-redness. Centella asiatica alleviates skin dryness, while enhancing the skin’s overall quality and appearance.

CHLORELLA VULGARIS EXTRACT

(*INCI: chlorella vulgaris extract*)

An algae extract that helps protect and improve the condition of the skin. It may be used to enhance skin smoothness and prevent collagen and elastin degradation.

CITRIC ACID (*INCI: citric acid*)

Used in association with arginin and madecassoside to beautify and fortify the lashes.

COHESION® (*INCI: ophiopogon japonicus root extract*)

Is included only in **Hydra Zen** Day creams. Known for its resistance to dryness and moisture-trapping properties, it helps strengthen the skin barrier function, thereby limiting excessive moisture loss.

CRANBERRY SEED OIL (*INCI: vaccinium macrocarpon (cranberry) seed oil*)

Known for its antioxidant properties, cranberry seed oil helps protect your skin against oxidative stresses. The cranberry seed oil in EDV is of natural origin.

CYATHEA MEDULLARIS

(INCI: *cyathea medullaris* leaf extract)

In the composition of [Up-Cohésion]TM Technology in **Rénergie Multi-Lift**. Popularly known as the black tree fern, it is a large tree fern up to 20 m tall. It is distributed across the south-west Pacific. Is associated with aiding in cell renewal, and helping rejuvenate ageing skin.

D

DAMASK ROSE (INCI: *rosa damascena* flower oil)

See rose extract.

DERMACTYLTM

Based on Sunflower Seed and Soy extracts boosts production of new collagen fibers and also prevent them from yellowing.

E

F

DETOXYLINE (INCI:*butylene glycol (and) butyrospermum parkii(shea) seedcake extract*)

Natural origin, recharge the self -defense of the skin.

DIMETHICONE (INCI: DIMETHICONE)

See silicone.

DI-PEPTIDE (INCI: *palmitoyl dipeptide-5 diaminoxybutyrate*)

Could help improve the lymphatic drainage. Help to reduce puffiness & dark circles.

DELWEISS EXTRACT

(INCI: *Leontopodium Alpinum extract*)

Has an antioxidant action by scavenging free radicals and strengthens the skin' barrier from stress markers.

ELLAGIC ACID (INCI: ellagic acid)

Reduces skin pigmentation. It helps to limit tyrosinase activity, to reduce inflammation and oxidation.

ESCINE (INCI: escine)

Comes from horse chestnut seeds has anti-inflammatory properties and anti-edema.

ESSENTIAL FATTY ACIDS

Required for the permeability of cell membranes in the epidermis. They contribute to a healthy stratum corneum, able to provide protection from external aggressions. E.g.: linolenic and linoleic acid.

FERMENTATION

This natural process relies on the activity of micro-organisms or bacteria. Fermentation is a food processing method used worldwide. Probably the oldest form of food preservation, it allows foods to be kept for several

months: the fermented dish kimchi in Korea as example, or cabbage which becomes sauerkraut. Fermentation can also be used to produce a transformation in some foods like bread, wine and cheese, yoghurt and kefir, beer and kombucha.

FERULIC ACID (*INCI:ferulic acid*)

Is a derivative of Rice Bran Oil. The ferulic acid in skincare products may be responsible for providing skin-protecting properties. As an antioxidant, the benefits of ferulic acid help to neutralize harmful free-radicals that are present in the environment. In skincare, ferulic acid helps to protect against oxidative stress and keeps the skin looking healthy and beautiful.

FICUS INDICA FLOWER EXTRACT (*INCI:opuntia ficus-indica flower extract*)

It is used for soothing and hydrating benefits.

FRENCH MELISSA (*INCI: melissa officinalis leafoil*)

Known for its soothing and calming benefits, it provides both antioxidant and anti-inflammatory actions. The french melissa in **Énergie de Vie** is 100% natural.

G

R

GENTIAN EXTRACT (*INCI: gentian lutea extract*)

It is well known for its anti-inflammatory properties. Studies indicate that the gentian root also has skin-lightening capacities.

GERANIUM FLOWER OIL

(*INCI: pelargonium graveolens flower oil*)

Is known for its antioxydant properties.

GINSENG ROOT EXTRACT

(*INCI: panax ginseng root extract*)

Known for its energizing effects, ginseng root extract also helps protect skin against oxidative stresses. The ginseng root extract in EDV is of natural origin.

GLYCERIN (*INCI: glycerin*)

Chemical origin. Known for its ability to absorb moisture from the air and hold it, helping the skin to stay hydrated. It improves the spreadability of products and has emollient and moisturizing benefits.

H

GLYCOLIC ACID (INCI: glycolic acid)

See AHA. Glycolic acid is the smallest member of the alpha hydroxy acid (AHA) family. Over centuries, glycolic acid benefits have become known to improve skin desquamation and is associated with softer, smoother, healthier and younger looking skin by reducing the appearance of fine lines and wrinkles.

GRAND ROSE EXTRACTS

Association of 3 roses:

- LANCÔME ROSE EXTRACT**

Stimulates regeneration of skin cells.

- ROSE ESSENTIAL OIL**

Helps accelerate skin regeneration.

- ROSE CONCENTRATE**

Helps soothe skin.

GUANOSINE (INCI: guanosine)

In the composition of the [Up-cohesion]TM Technology was chosen for its effects on the organization and densification of the network of collagen fibers, main constituent of the dermis. Guanosine is a nucleoside that helps to restructure the dermal matrix.

HEPES (INCI: hydroxy ethyl piperazine ethane sulfonic acid)

It is a powerful exfoliant that acts physiologically rather than mechanically to limit roughness. L'Oréal Research & Innovation has patented its activity. HEPES is as efficient as glycolic acid, yet it has a superior skin tolerance.

HONEY (INCI: mel)

Sustainably produced by bees. Composed of a variety of sugars and wax, it is used as an emollient. It also has moisturizing and softening properties. Strong antibacterial

and immunological properties are attributed to honey.

HUMECTANT

Hygroscopic substance that attracts and retains water. Moisturizes the skin. E.g.: Propylene glycol, urea, honey, ceramides, glycerin, sodium hyaluronate, sorbitol.

HYALURONIC ACID (INCI: sodium hyaluronate)

Hyaluronic acid is a natural component of the dermis that plays an important role in moisturizing the skin. This substance fills the space between the collagen and elastin fibers. It decreases in quantity and quality with age or with exposure to environmental factors, which causes the skin to dry out and wrinkle. Hyaluronic acid has the ability to hold up to 1000 times its weight in water. Intended to fill the intercellular spaces and retain water in the skin, it contributes to a dense skin texture and rebound, characteristic of a beautiful quality of skin.

HYDROSOLUBLE

Water-soluble.

HYDROXY ACID (INCI: vaccinium myrtillus fruit extract (and) saccharum officinarum (sugar cane) extract (and) citrus aurantium dulcis (orange) fruit water (and) citrus limon (lemon) fruit extract (and) acer saccharum (sugar maple) extract)

E.g of AHA: Lemon fruit extract, Vaccinium myrtillus fruit extract which are in phase 1 of **Visionnaire Crescendo™**. AHA exfoliate the skin by promoting the elimination of dead cells from the skin's surface. It helps to improve skin tone and clarity.

HYDROXYETHYL UREA (INCI: hydroxyethyl urea)

It is used to moisturize and soothe skin.

I J

IVY EXTRACT

(INCI: *hedera helix extract*)

Natural origin. Skin toning properties. Said to have a slimming and anti-cellulite effect due to its ability to prevent water accumulation in the skin tissue. Ivy extract is considered antibacterial, astringent, tonic and soothing, particularly in burn cases.

JASMONATES

• LR 2412 JASMONATE MOLECULE

(INCI: *sodium tetrahydrojasmonate*)

Le LR 2412 jasmonate molecule reinforces the quality of skin, with visible results at the surface. It is known to help improve the concentration of hyaluronate in the skin to restore a smoother texture.

• MDH JASMONATE

(INCI: *methylidihydrojasmonate*)

Also known to help improve the concentration of hyaluronate in the skin.

JOJOBA OIL (INCI: *simmondsia chinensis seed oil*)

Jojoba oil reduces trans epidermal water loss. It is as well an emollient and softening agent. Provides suppleness and softness.

K

KOJIC ACID (INCI: *kojic acid*)

Absorbs water.

LACTOBACILLUS FERMENT

Helps neutralize inflammation.

L

LAVENDER FLOWER OIL

(INCI: *lavandula angustifolia oil*)

Is known for its many therapeutic properties: balancing, energizing, soothing and healing.

M

LEMON ESSENTIAL OIL

(INCI: *citrus limon (lemon) peel oil*)

The essential oil has astringent and antiseptic qualities that freshen, stimulate, and rejuvenate sluggish skin, by encouraging epidermal exfoliation. Lemon peel oil increases radiance in dull skin, and has detoxifying properties.

LINSEED EXTRACT

(INCI: *linum usitatissimum seed extract*)

Known for its anti-ageing properties. It helps to reinforce the dermis, to reduce the appearance of wrinkles and to improve skin firmness.

LIPOSOLUBLE

Soluble in oil.

MADECASSOSIDE

(INCI: *centella asiatica extract*)

A derivative of centella asiatica, used in association with arginin to beautify and fortify the lashes.

MAJORAM LEAF OIL

(INCI: *origanum majorana leaf oil*)

Known for its soothing effect onto the skin.

N

MEXORYL® SX

(INCI: *terephthalylidene dicamphor sulfonic acid*)

Patented UVA filter (filtering short-wavelength UVA especially). It is photostable and retains its filtering capacity over time. Mexoryl® SX is a molecule created in our laboratories. It is hydrosoluble.

MEXORYL® XL (INCI: *DTS, drometrizole trisiloxane*)

Wide-spectrum filter, absorbing at both UVA and UVB wavelengths. It is photostable and keeps its filtering capacity over time. Mexoryl® XL is a molecule created in our laboratories. It is liposoluble.

MINT EXTRACT

(INCI: *mentha piperita (peppermint) extract*)

Reduces inflammation.

MORINGA EXTRACT

(INCI: *moringa oleifera seed extract*)

Helps purify skin and protects skin against pollution, heavy metals and free-radicals.

MU DAN PI (PEONY)

(INCI: *paeonia albiflora root extract*)

Known for soothing and anti-oxidant properties. Promotes cellular communication between keratinocytes (epidermal cells) and fibroblasts (dermal cells). Also has anti-inflammatory properties. 2 raw materials: Paeonia suffruticosa root extract (**Absolute White Aura**) & Paeonia Albiflora Root Extract (**Hydra Zen**).

NEEM LEAF EXTRACT

(INCI: *melia azadirachta*)

Known to soothe skin, target inflammation and help reduce the appearance of dark spots. Natural Moisturizing factors. They constitute the natural hydration of the stratum corneum system.

O P

The NMF: Urea, Pyrrolidone Carboxylic Acid, Lactic Acid (about 10% each), Amino Acids (40%) and sugars.

N-STIMULINE

Riche in proteins and amino-acids to reinforce nocturnal skin renewal process.

OCTOCRYLENE (*INCI: octocrylene*)

A water-resistant UVB sunscreen. It exhibits good photo stability and a rather broad-band absorption range.

OLIGOPEPTIDE RARE (*INCI: acetyl tetrapeptide-9*)

Peptides are composed of two to twelve amino acids. They stimulate the production of collagen fibers. They help to improve the firmness, tone and elasticity of the skin.

OLIGOSIDE (*INCI: secale cereale (rye) seed extract*)

Rye seed extract. It helps to improve connections between fibroblasts and the extracellular matrix. To fight wrinkles and lack of firmness.

OXYBENZONE (*INCI:benzophenone-3*)

A highly effective UVA & UVB absorber that is used to enhance SPF in sunscreen formulations.

PALMITIC ACID (*INCI: palmitic acid*)

One of the skin's major fatty acids produced by the sebaceous gland. Emollient that reinforces the skin's barrier function.

PANTHENOL (*INCI: panthenol*)

Well known for its moisturizing properties. Panthenol appears to stimulate cellular proliferation and aid in tissue repair. It is able to hold water in the product or water from the environment, resulting in a moisturizing effect. It also acts as an anti-inflammatory agent and non-comedogenic raw material.

Q

PHYTOSPHINGOSINE

(INCI: *salicyloyl phytosphingosine*)

Improves the skin's barrier function. Acts on collagen synthesis. Reinforces the Dermo-Epidermal Junction (DEJ). Helps reduce the appearance of wrinkles.

PLANT OILS

(Soy, black current seed, sunflower, rose canina fruit) - suspended in a hydrating water phase, these light, silky oils nourish and give skin extreme softness and comfort thanks to a process that reduces the size of each oil droplet by 20 times.

PROBIOTICS

They are live microorganisms (bacteria and yeasts) that participate actively in fermentation. They are often called "good" or "helpful" bacteria because they provide health benefits to their host.

PRO-XYLANE™

(INCI: *hydroxypropyl tetrahydropyrantriol*)

Developed and created by L'Oréal Research and Innovation, Pro-Xylane™ is a sugar-molecule derived from the beech wood tree utilizing green chemistry. It functions, *in vitro*, by stimulating the production of proteoglycans, a water-absorbing molecule in human reconstructed skin. It rebuilds the skin matrix to restore the appearance of radiant, youthful skin, with fewer wrinkles and more density and firmness.

QUINOA HUSK EXTRACT (INCI: *chenopodium quinoa seed extract*)

It enhances the natural exfoliation of skin cells to smooth and brighten skin. It's a sustainable ingredient which belongs to the phase 1 of **Visionnaire Crescendo™**.

R

QUINOA (INCI: *chenopodium quinoa seed extract*)

Sustainably sourced from the protective outer shell of the Quinoa seed without chemical alteration and with minimal environmental impact. Its powerful exfoliating properties work to help accelerate surface skin's nighttime cell turnover process to release dull surface skin.

R.A.R.E. OLIGOPEPTIDE (INCI: *acetyl tetrapeptide-9*)

Helps stimulate the production of collagen fibers and help to increase skin firmness, tonicity, and elasticity.

RED DULCE (*INCI: palmaria palmata extract*)

The Algae family is comprised of more than 20,000 different known species, each containing chlorophyll as its primary photosynthetic pigment. Given its natural inclination to process sunlight, red algae has been proposed to help provide the skin with potent antioxidant protection. A member of the algae family, red dulce extract helps dissolve excess melanin within the epidermis and boosts melanolysis.

RESORCINOL (*INCI: phenylethyl resorcinol*)

An antioxidant that is considered effective in reducing the formation of pigmentation, and used as a brightening ingredient in skin care products.

RESVERATROL (*INCI: resveratrol*)

Molecule selected by L'Oréal Research & Innovation. Stimulates mitochondrial synthesis, restores the skin's energy balance, and acts on skin density.

RETINOL (*INCI: palmaria palmata extract*)

Is a fat-soluble derivative of Vitamin A that must be derived through diet.

It is an ideal ingredient for potentially enabling the skin's natural protecting abilities. By speeding up cell-turnover rate, retinol may help to visibly revitalize skin, as well as improve the appearance of facial lines and skin-discoloration.

ROSE EXTRACT

See also Grand Rose extract p. 15.

Rose essential oil is able to reinforce the skin's vital revitalizing processes by acting on chronic inflammation, free radicals (oxidation) and skin repair.

The rose extracts used by Lancôme are:

- **DAMASK ROSE** (*INCI: rosa damascena flower*)

Extracted through a cold distillation process.

Lancôme Research has identified a specific cold distillate of Damask rose (*rosa damascena*) capable of aiding the skin's vital revitalizing processes by acting on chronic inflammation, free radicals (oxidation) and skin repair.

- **ROSA CENTIFOLIA EXTRACT**

(*INCI: rosa centifolia flower extract*)

A biotechnological active ingredient with extraordinary regenerating potential.

- **ROSA GALlica** (*INCI: rosa gallica flower extract*)

Used for its anti-inflammatory and soothing properties.

- **ROSEHIP EXTRACT** (*INCI: rosa canina fruit oil*)

Used for its nourishing, abilities.

- **ROSE WATER** (*INCI: rose water*)

Used to hydrate, soothe and cool skin. Also credited with anti-bacterial properties.

ROSEHIP SEED OIL (*INCI: rosa canina fruit oil*)

See rose extract.

ROSEMARY LEAF OIL

(*INCI: rosmarinus officinalis (rosemary)*)

It helps to stimulate the cell turnover.

RYE SEED EXTRACT

(*INCI: secale cereale (rye) seed extract*)

See Oligoside.

S

Y

S

SALICYLIC ACID (*INCI: salicylic acid*)

Promotes the exfoliation of dead cells. It helps smooth skin imperfections. It cleans the pores and tightens them. It is antimicrobial, antiseptic, and enhances the activity of preservatives. Acetylsalicylic acid, also known as aspirin, is a drug used to reduce fever.

SCHIZANDRA EXTRACT

(*INCI: schizandra chinensis fruit extract*)

The berries of schizandra are used in traditional medicine in East Asia. It is consumed as tea and wine of pinkish-red color. It soothes the skin and helps reduce redness. It is also used to re-balance skin contrast for a more even and luminous skin tone.

SEAWEED EXTRACT

(*INCI: betaine (and) laminaria ochroleuca extract*)

Known for its anti-inflammatory and skin soothing properties.

T

SHEA BUTTER

(INCI: *butyrospermum parkii (shea) butter*)

Natural fat obtained from the nut of the African shea tree. Known for its hydrating and nourishing properties. It alleviates skin dryness, and has sun protection and high skin penetration properties.

SILICONE

Silicones are used to give products lubricity, slip and a sensorial feeling. They protect the skin against moisture loss when used in sufficient quantities.

SOY (INCI: *glycine soja (soybean) oil*)

Redensifies the dermis by stimulating the synthesis of collagen, elastin & proteoglycans.

SUNFLOWER OIL

(INCI: *helianthus annus seed oil*)

Known for its nourishing properties.

SWEET ALMOND OIL (INCI: *sweet almond oil*)

An emollient with soothing properties. Provides an elegant skin feel and promotes spreadability in creams and lotions.

SWEET ORANGE ZEST OIL

(INCI: *citrus aurantium dulcis (orange) peel oil*)

Is known for its anti-inflammatory properties.

SYMWHITE

See resorcinol.

TITANIUM DIOXIDE (INCI: *titanium dioxide*)

Pigment that provides very high sun protection against UVB and UVA.

U

UP-COHESION™

[Up-Cohésion]™ Technology (*cyathea medullaris* Extract + Guanosine) has been shown to increase the surface covered by attachment structures to reinforce cell-matrix cohesion.

V

VITAMIN A (RETINOL) (INCI: retinyl palmitate)

Found in carrots, melons, and apricots, as well as in animal livers. Stimulates the skin's natural defenses and fights skin ageing.

Also treats acne at strong concentrations. E.g.: retinyl palmitate.

W

VITAMIN CG (INCI: ascorbyl glucoside)

Vitamin C derivative. Antioxidant action. Known for its affinity with the skin and its powerful ability to improve the appearance of skin ageing. Also known for a skin brightening action.

VITAMIN E (INCI: tocopherol)

Naturally occurring in plant leaves, cereal germ oils, and milk. Is known to be an important antioxidant to stop free radicals, which trigger the ageing process of the skin.

VITAMINS

Molecules essential for vital processes. Some vitamins may not be produced by the body and so have to be introduced in food.

WHITE PEONY ROOT EXTRACT

(INCI: *paeonia albiflora* root extract)

Known for anti-inflammatory properties, it helps limit oxidative stress and indirectly limits the production of melanin. Fight against the appearance of dark spots, and heterogeneous skin pigmentation.

WILD YAM (*INCI: hexyldecanol (and) dioscorea villosa (wild yam) root extract*)

Helps increase GAG synthesis and nourishes the skin. It helps keep the skin healthy, supple and in good condition. Used in anti-ageing and anti-wrinkles products.

Y

YEAST EXTRACT (*INCI: yeast extract*)

An essential yeast that has been used for centuries for fermentation.

A probiotic fraction at the heart of **Advanced Génifique**. Helps to improve skin structure for firm bouncy skin.

We are Happiness Activists
