## Open access options

This journal offers authors two choices to publish their research:

(<https://www.elsevier.com>)

Articles are freely available to both subscribers and the wider public with permitted reuse.

An open access publication fee is payable by authors or their research funder.

### Subscription

Articles are made available to subscribers as well as developing countries and patient groups through our access programs (<https://www.elsevier.com/access>).

No open access publication fee.

MENU

In accordance with Funding Body requirements, Elsevier does offer alternative open access publishing options. Visit <https://www.elsevier.com/openaccess> (<https://www.elsevier.com/openaccess>) for full information.

Your publication choice will have no effect on the peer review process or acceptance of your submission.

## Details on Gold Open Access Articles

### User Rights

All articles published gold open access will be immediately and permanently free for everyone to read and download. We offer authors a choice of user licenses, which define the permitted reuse of articles (see <https://www.elsevier.com/openaccesslicenses> (<https://www.elsevier.com/openaccesslicenses>)). We are continuously working with our author communities to select the best choice of license options, currently being defined for this journal as follows:

- Creative Commons Attribution (CC BY)
- Creative Commons Attribution-NonCommercial-NoDerivs (CC BY-NC-ND)

### Gold Open Access Publication Fee

To provide gold open access, this journal has a publication fee which needs to be met by the authors or their research funders for each article published open access. The gold open access publication fee for this journal is **USD 2400**, excluding taxes.

### Funding Body Agreements

Elsevier has established agreements with funding bodies (<https://www.elsevier.com/fundingbodies>), including Wellcome Trust and Research Councils UK. This ensures authors can comply with funding body open access policies and may also be reimbursed for their publication fees.

## Elsevier supports responsible sharing

Find out how you can share your research (<https://www.elsevier.com/sharing-articles>) published in Elsevier journals.

## Green Open Access (e.g. self-archiving)

Authors can share their research in a variety of different ways and Elsevier has a number of green open access options available. We recommend authors see our green open access page (<https://www.elsevier.com/greenopenaccess>) for further information. An author can also self-archive their author manuscript immediately and enable public access from their institution's repository after an embargo period. This is the version that has been accepted for publication and which typically includes author-incorporated changes suggested during submission, peer review and in editor-author communications.

An author is entitled to post the accepted manuscript (<https://www.elsevier.com/about/our-business/policies/sharing/accepted-manuscript>) in their institution's repository and make this public after an embargo period (known as green Open Access). The embargo period for this journal can be found below.

The published journal article (<https://www.elsevier.com/about/our-business/policies/sharing/published-journal-article>) cannot be shared publicly, for example on ResearchGate or Academia.edu, to ensure the sustainability of peer-reviewed research in journal publications.

### Embargo Period

For subscription articles, an appropriate amount of time is needed for journals to deliver value to subscribing customers before a manuscript becomes available for free to the public. This is called an embargo period and it begins from the date the article is formally published online in its final and fully citable form. Find out more (<https://www.elsevier.com/about/open-science/open-access/journal-embargo-finder>) This journal has an embargo period of 36 months.
