HISTORY

Innovation & Tradition since 1969

For over four decades, Fernandes Guitars has dedicated itself to building quality guitars and guitar accessories. Throughout the company's history, we have sold a quality line of products, making them the largest guitar manufacturer in Japan.

Fernandes Guitars began in 1969 in Japan, originally building Flamenco guitars. As the company flourished over the years, the company expanded its production line to include an extensive line of acoustic and electric guitars, bass guitars, amplifiers and accessories.

During the 1970's, the company established its name through building guitars that challenged other well reputable guitar manufacturers from the United States and Europe. Artists such as Steve Jones (Sex Pistols), Robert Fripp (King Crimson) and Steve Hackett (Genesis) are some of the musicians that have played the early models.

In 1992, following the company's reputation and history of success throughout Asia, Fernandes USA opened its doors in Los Angeles, California. Sticking to its reputation of building quality products, it quickly established a presence within the American guitar market by offering quality instruments at affordable prices.

In 1996, the Fernandes USA Custom Shop made bold moves by expanding its scope by advancing development within its guitar craftsmanship. Through models like the Ravelle and Nomad, which introduced the Sustainer System technology, our Research and Development Department sought out how guitar players of the future would play. Catering to everyone from the first-time buyer to the seasoned pro, Fernandes offers many options to meet their needs. An invaluable understanding of the player fuels our strong commitment to the consumer and the quality they demand. This is the approach that helps establish Fernandes as the leading guitar manufacturer in Japan and to become a competitive manufacturer in the American Market.

Using the elements of traditional style with contemporary techniques, Fernandes continues to provide a unique voice for today's musician, pushing the limits of guitar manufacturing with innovative body shapes and hardware configurations. Guitar players demand a vintage feel with a modernized look. Fernandes supplies the best of both worlds without any compromise. Fernandes is the key to defining your sound and taking it to the next level.

Fernandes is your key to a superior realm of tone and redefinition of sound

Every Fernandes Instrument is Set-Up by Professional Technicians in the U.S.A. and is Protected by a Lifetime Warranty.

Specifications are subject to change without notice. Warranty guaranteed in U.S. only. Outside the U.S. please contact your distributor. ©2011 Fernandes Guitars International Inc.

SUSTAINER

The Power of Infinite Sustain

What is the Fernandes Sustainer™?

The FERNANDES SUSTAINER™ is a uniquely designed electronic system that enables the controlled sustain of any single or group of notes within the guitar's sound range. At your discretion, strings will emit sound at a consistent intensity until stopped, regardless of output and/or location, even if the guitar is not connected to an amplifier! How's that for starters?

How does it work?

The patented FERNANDES SUSTAINER™ system generates a magnetic field causing the strings of the guitar to vibrate. Powered by a 9-Volt battery, the interaction of the bridge humbucking pickup (B), the Sustainer Circuit Board (C) and the neck Sustainer Driver pickup (A), projects magnetic pulses that continuously vibrate the strings of the guitar, the same way an amplifier would at extreme volumes, yet totally controlled! The result is infinite sustain and/or feedback using sparkly clean or loud distorted settings without the need for excessive volume or extra outboard gear!

What can the sustainer do for you?

Enhance your creativity with the Fernandes Sustainer™. Use with any combination of gear in your arsenal of effects, amp modelers and home recording equipment. Discover new sounds as you explore the world of controlled sustain and feedback. How do you get natural sustain using digital effects? You can't! It's The Fernandes Sustainer that makes this possible!

Modes

1. Natural Mode: The note(s) will continue to ring its natural fundamental tone as long as the string(s) are free to vibrate and the Sustainer System is on.
2. Harmonic Mode: Within seconds, the pitch of the ringing note(s) will rise to the 5th natural harmonic.
3. Mix Mode: Available on select models including our FSK-401 Sustainer Kit, the Mix mode blends the Natural and Harmonic Modes to harmonize indefinitely every ringing note creating a harmonized feedback effect.

FERNANDES SUSTAINER™ KITS

Share your musical mind with the world. The Fernandes Sustainer™ Kits brings you the most advanced technology in Magnetic Sustaining Systems with two options suitable for most guitars.

FSK-101 - The official Fernandes Sustainer™ Kit with a Humbucker Size Sustainer Driver and an affordable basic configuration.

Now you can have the power of infinite sustain in any guitar with a neck humbucking pickup configuration! Contact your local dealer and order now while supplies last!

© FSK-101 kit Includes:

- Humbucker Size Sustainer Driver
- Sustainer Circuit Board
- Easy Access Battery Box
- 1 Stereo Jack
- 1 Battery Connector
- Connection Wires and Clips
- One 9 Volt Battery
- Installation Manual

FSK-101

FSK-401 - Our first and now legendary Fernandes Sustainer™ Kit with a Single Coil Size Sustainer Driver. Complete electronics package brings Sustain Control to higher limits.

© FSK-401 kit Includes:

- Single Coil Sized Sustainer Driver
- Sustainer Circuit Board
- Optional High Output Humbucker
- Easy Access Battery Box
- 1 Volume Pot
- 1 Tone Pot
- 1 Sustainer Intensity Pot
- 5 way Pickup Selector Switch
- 1 Stereo Jack
- 1 Battery Connector
- Connection Wires and Clips
- One 9 Volt Battery
- Installation Manual

FSK-401

VULCAN

A re-designed, streamlined version of our vintage Vertigo shape, the brand new Vulcan has all the right elements to become a modern classic

VULCAN JP

Boasting a two-piece African Mahogany body, Maple neck, Select Rosewood fretboard, and an EMG-81 pickup on the bridge position. The acclaimed Fernandes Sustainer System completes the specs for this versatile axe! Like its JP series model counterparts, the Vulcan JP has a titanium-reinforced neck, to guarantee maximum stability and consistent playability for years to come

Vulcan® Elite JP

Body: Alder
 Neck: Maple, Set Neck
 Fingerboard: Rosewood, 25 1/2" Scale, 24 Jumbo Frets, 14" Radius, Pearl Split Trapezoid Shape Inlays
 Nut: Gotoh Locking 1 5/8"
 Tuning Gears: Gotoh Die Cast
 Bridge: Gotoh Floyd Rose Licensed Tremolo
 Features: FERNANDES SUSTAINER SYSTEM
 KTS Titanium Neck Reinforcement Rods
 Controls: 3-Way Toggle Switch, SUSTAINER ON/OFF & Mode Switches, 1 Volume, 1 Tone
 Pickups: Neck: SUSTAINER, Bridge: EMG-81

DRAGONFLY

The Dragonfly remains a symbol of versatility and elegance, made to engage in any musical style. Art meets performance within this model. Available in all versions and a variety of finishes.

"The Dragonfly would be a fine instrument even if it only had the two pickups. It's well made, very attractive, and sounds great. When you add the Sustainer to the equation, however, the Fly becomes a wildly unique guitar that is just bursting with creativity. This is a great guitar. If you can't instantly come up with an inspiring part when you plug in the Dragonfly, you need to check your pulse."
- Guitar Player Magazine

DRAGONFLY JP

The new Japanese Dragonfly boasts a beautiful 5A quilted maple top, a solid mahogany back and a 24 3/4" fingerboard, that accommodates 24 frets for maximum shredding speed. The dual-cutaway design ensures access to all frets.

REVOLVER CLASSIC SERIES

Made in Japan

Hailing from the land of the rising sun, cradle of Fernandes' name and legacy, a classic breed of guitars reappears. Reviving the legendary craftsmanship of early Fernandes models from previous decades, the Revolver Classic Series brings superb finesse and playability to all music styles. Loaded with the popular Seymour Duncan Distortion humbucker in the bridge, cool rails in the middle and the Fernandes Sustainer in the neck position, coil tap switch, bone nut, pearl pickguard, gotho tuners and Wilkinson Vintage Tremolo, you have all the tools necessary to play, look and sound like a pro.

ACCESSORIES

CASES

Protect your instrument with FERNANDES Gig-Bags and Hard Cases. Whether you are gigging around town or across the world, from guitars to basses, we've got you covered.

MODELS:

SC-G: Guitar Gig Bag
SC-B: Bass Gig Bag
FMC-M: Molded case specially designed for Monterey, Ravelle and Dragonfly (Elite/Deluxe)
FMC-G: Standard Guitar Molded Case, fits Revolver, Retrorocket and Dragonfly (Pro/X)
FMC-B: Bass Molded Case
HC Wooden Hard Cases:
Available for all guitar and bass models.

Picks

A high-tech attack on modern tone, the PPS and Stainless Steel represent the ultimate in guitar pick making technology.

-PPS: Made from Polyphenylene Sulfide a material commonly used in automobile and computer parts the PPS picks are lightweight but hard enough to ensure picking is strong and precise, so the pick provides accurate attack with a full-bodied tone as it strikes the string. Silicon rubber based surfacing on each side, makes this pick ideal for fast picking styles. Available in Teardrop and Jazz shapes, and 0.8mm-1.0mm-1.2mm gauges.

-Stainless: Stronger than Iron, resistant to corrosion and heat, with a brighter metallic tone, the Stainless Steel makes your attack nothing short of lethal.

Skull Knobs

The Fernandes Custom Skull-Knobs can turn your gear into a menacing metal machine. They look great on guitars, basses, amps and effect processors. Featuring a highly detailed 3-D design that faces the audience instead of the floor, the knobs fit both standard and metric shafts using a special insert for a smooth wobble-free fit.

APPAREL

Represent! Let the world know what you play even when you're not playing.

-T-Shirts: white on black and red/gray on black. M, L & XL.
-Workshirts: white embroidery on black. L & XL.

Fernandes Sustainer™

THE POWER OF INFINITE SUSTAIN

Since the 1960's, electric guitarists have been left scratching their heads, seeking an effective way to control sustain and feedback. Behold!

The FERNANDES SUSTAINER™ ... puts that power right at your fingertips with just the flick of a switch. Bust out texture and tonal coloring ala Hendrix at any level of volume with our patented technology. Use the Sustainer on single notes, use it on chords, adjust it to give swells or for a gradual decay to the 'sustain'.

"I've played tons of guitars live and in the studio, and I can easily say that my Fernandes Sustainer guitar has some of the tones that I'm most proud of and most excited about.

On my last two albums, all of that singing, screaming tone is coming out of my Fernandes"

Marty Friedman

"With the Fernandes Sustainer I think I've scared all of the other animals away. The sounds of hell just became more interesting."

Kerry King

The Fernandes Sustainer gives my guitar playing a whole new dimension. As a matter of fact it's sort of a dimension of slow motion. I actually can play long slow notes now."

Steve Vai

A FEW WORDS OF WISDOM

"My Fernandes Sustainer gives me infinite sustain as it should be with control and musicality."

The Edge

A great thing to have when you're in a sonically hostile environment"

Slash
