FEATURES

TRIANGLE-X STRUCTURE (TX series) Triangle-X – Super body structure. Product in pursuit of super sound to create music for the new era. One piece neck and body. Precision carved by the numerical control routers. Concentrates the bridge and tailpiece, pickups, etc. – most important factors for transmitting the vibration to the body – on the triangle zone. Creates surprising long sustain, flexible bass and mid-range, and sharp treble and versatile Triangle Sound. Another big feature of this series is the super balanced body offering the superior playability through the unique original design.

Patent Pending

TRIANGLE-X STRUCTURE (TXB series) World's first triangle body. New sound concept – unquestionably moves the world of the electric guitar and bass a step forward. Super sound system composed of the triangle zone in maple on the top and in mahogany on the back. Crystallized the very revolutionary sound by introducing the theory of the TX series into this TXB series. Another very important factor of this TXB series is the daring layout of the pickups different from any other electric bass.

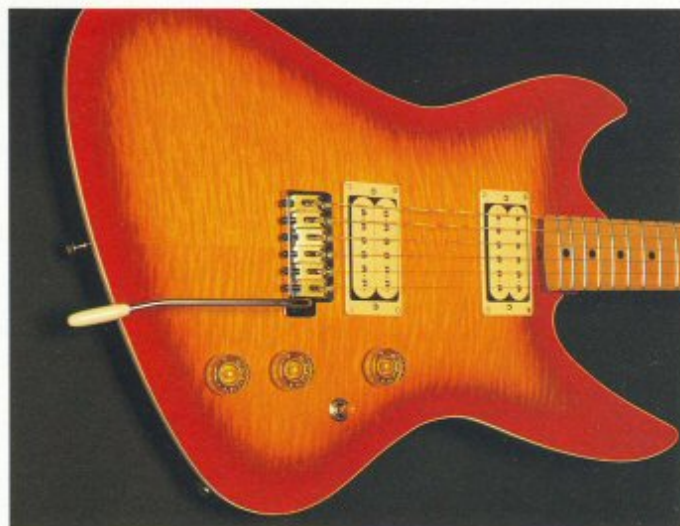

Patent Pending

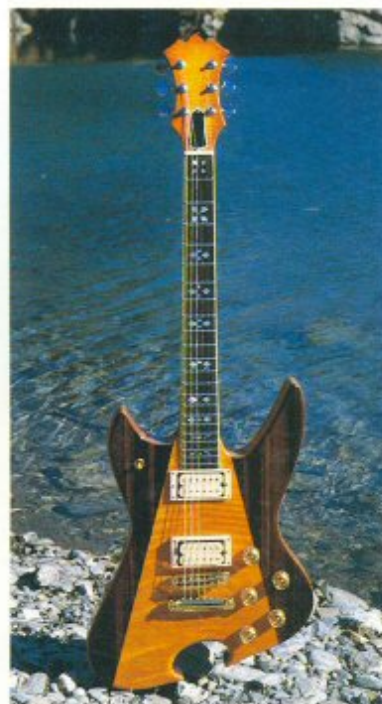

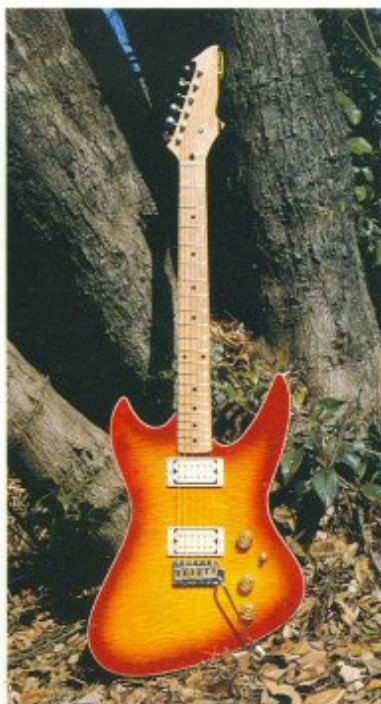

Patent Pending

SUPER DETACHABLE (ZF series, TXB series) Tokai Original Super Detachable Neck System. Unchallenged. This system turns down all the existing ordinary detachable neck joint conception. Perfectly solved all the past problems such as difficulty at high position and clumsy mounting – the two biggest disadvantages of the conventional detachable neck system. Promises superb playability and perfect feel at the joint. Secures the neck onto the body with the 5 mm thick brass nuts. Produces miraculous long sustain.

BRASS BRIDGE and TREMOLO UNIT (ZF series, VS series) Tremolo unit mounted on the brass bridge produces superb long sustain. Extreme care is taken in the setting, especially with the ZF and VS series models. Hold tune and create not only tricky arming sound but also very exciting expressive vibrato at your will. Proud of superior durability by adopting a very special alloy tremolo unit and tremolo arm.
