

WHILE OUR TECHNOLOGIES FREQUENTLY HELP SAVE THE LIVES OF POLICE OFFICERS, IT ALWAYS HELPS TO SUPPORT THE WIDOWS & ORPHANS FUND.

HONORED SUPPORTER

While we are are deeply saddened by the need, we are honored to provide financial support to widows and orphans of police officers.

At U.S. Gate Supply, we are extremely concerned about the safety of Police Officers that are on the streets protecting the public. Because of this concern, we are constantly searching for the latest life saving technology available for Police Officers. By incorporating these technologies into the line of duty, Officers are now able to do things like send an alert when they are in distress. This alert not only tells fellow officers that a colleague is in trouble, but it also helps fellow Officers immediately locate them and come to their rescue. We also discovered a technology that sends an

alert when Police Officers are forced too far away from their police vehicle. Sadly, while these kind of technologies can significantly increase the chance of saving Officer's lives, they cannot prevent tragedy in all cases. To show our deepest respect for Officers who perish in the line of duty, U.S. Gate Supply is honored to support the Widows & Orphans Fund. In our continued desire to reduce the risk of Officers being mortally wounded in the line of duty, we shall maintain our quest to seek out life saving technologies and will be certain to keep your Police Department informed of any new developments.
