

*Cimar Electric Guitars*

# Cimar Astra Series Electrics

Cimar Astra series electrics have all the most asked for features at a very modest cost. Their appearance and sound is in a par with instruments costing several times the price. The Astra series also offers three different types of body and neck construction. Astra 2085 models feature a neck that runs the full length of the instrument and 2083 and 2080 models feature modular hub-in or detachable necks respectively. When you add up features and value it's hard to beat the Cimar Astra Series.

## ADJUSTABLE TORQUE MACHINE HEADS

The Astra 2085 also features adjustable torque, die cast machine heads. The action of the machine heads can be adjusted from light to heavy to suit any player's taste.

## MAGNA-6 PICKUPS

Cimar Magna-6 pickups offer the hot output and classic appearance you're looking for. The cream-colored coils are wound for very high output and the high power ferrite magnet and adjustable polepieces assure you of brightness and balance.

## BRASS NUT

Astra 2085 and 2083 feature a solid brass bead nut for improved sustain and better balance between open and fretted notes.

## FULL-LENGTH NECK AND SMOOTH HEEL

The neck of the 2085 Model is laminated from rock maple and select walnut. It runs the full length of the guitar for the best possible sustain and extreme rigidity. Because there is no neck-to-body joint the heel of the neck can be made smooth for easy action in the upper register.

## DUAL-MODE PICKUP SWITCHES

The Magna-6S pickups on the 2085 Model each feature a special two-way mode switch for added versatility. The switch converts the pickup from a standard humbucking to a parallel wired humbucking. This changes the tone from a thick warm humbucking sound to a bright, full sound much like that of a single coil pickup.

## EBONY FINGERBOARD WITH ABALONE MARKERS

The Astra 2085 is one of the few guitars in its price range to offer the superb feel and history of a select ebony fingerboard. The dot-style position markers are genuine abalone.

## FOUR OCTAVE FINGERBOARD

All Astra Series guitars feature a 24 fret fingerboard for four full octaves of playability.

## ASTRA 2085

The Astra 2085 has all the deluxe features you could ask for. The maple and walnut neck runs the full length of the instrument and the ash body sections enhance both the appearance and sustain. Magna-6S pickups, gold plated hardware, Dual-Mode switches and a distinctive 4 x 2 prehead are but a few of the many fine points of the 2085.

|                     |   |
|---------------------|---|
| Body:               | ash, Maple laminated  |

# Astra Series

## UNIQUE LAMINATED BODY

The body of the Astra 2083 is laminated from beautiful Justin wood accented with wachau stripes.

## MAGNA-6 PICKUPS

The Astra 2083 models have two of the warmest sounding humbuckers in guitars—the Magna-6's. Their classic design pickups are specially made for the Astra series.

## DUAL-MODE PICKUP SWITCHES

The Dual-Mode pickup switches of the 2083 allow you to select between standard humbucking and parallel humbucking modes for each pickup for a wide variety of sound possibilities.

## ASTRA 2083

The Astra 2083 Models perform as good as they look. Their striking appearance is only the beginning of their appeal. The Magna-6 pickups literally pour out warm and clear tones while the long-scale rock maple neck is an effortless joy to play.

|                     |   |
|---------------------|---|
| Body:               | Justin wood (laminated from stripes)  |
| Neck:               | Laminated rock maple, 34 1/2", 24 fret  |

| Available colors:   | Amplifier Cherry (AC), Special Satinwood (BS)                                     |

## MAGNA-6 PICKUPS

The Magna-6 pickups on the Astra 2080 have a classic appearance and a sound to match, the warm, familiar sound of the Magna-6 is full, rich and pleasing. The output is also considerable better than other pickups of this type.

## ASTRA 2080

The Astra 2080 Models while reasonably in price, give you features like Magna-6 pickups and a five-course fingerboard. The straight ahead approach of the 2080 gives you all the performance you expect without extra.

## DUAL VOLUME AND TONE CONTROLS

In order to let you balance your sound the way you want it, the Astra 2080 features individual volume and tone controls for each of the two Magna-6 pickups.

|                     |   |

| Available colors:   | Amplifier Cherry (AC), The 5-1/2" Mustang body (BS), White Red (BR) |

## XR Series

### XR MODELS

The entirely new line of *Clarke XR Model* electric guitars offers many improvements over other guitars of similar construction. From the high output pickups to the solid brass bridge saddles, the XR Models have all the updated features you could want.

### HIGH OUTPUT SINGLE COIL PICKUPS

The pickups featured on the XR Models are used for increased output over similar single coils. The added output results in a sound that is big and full. Because of their single coil design, XR pickups have extended high frequency response for bright, ringing chords and crystal clear solos.

### FIVE POSITION PICKUP SELECTOR

The five position pickup selector on the XR Models allows you to select any pickup individually or from middle or rear/middle combinations.

### DIE CAST BRIDGE WITH SOLID BRASS SADDLES

The XR bridge is heavy die-cast metal and the bridge saddles are solid brass. This combination provides the sustain, intonation and quick response.

## XR Basses

### XR BASSES

*Clarke XR basses* offer clarity, punch and superb feel at a modest price. Available in either single or double pickup models, and in a variety of finishes, XR basses are one of the best values on the market.

### DIE CAST BRIDGE WITH SOLID BRASS SADDLES

The XR bass bridge is precision die cast from zinc alloy and features solid brass hump-type saddles for excellent intonation. Each saddle is individually adjustable for height and intonation length.

### XR BASS PICKUPS

XR bass pickups are single coil designs with a wide frequency response for a pure and clear sound. You'll be well pleased with punch, clarity and excellent output of the XR bass.

# SC Series

## SC MODELS

Every SC model features a graceful single cutaway body and the warm sound of Magna-Buck™ humbucking pickups. The bodies are constructed of carved solid or carved maple or mahogany for excellent response and sustaining power. The 2000 and 2001 Models feature a built-in mahogany neck and select choice tuning machines.
