## **Statement of TechNet on DMV's Proposed Rules for Self-Driving Cars**

*Sacramento* – TechNet, the national, bipartisan network of innovation economy CEOs and senior executives, today issued the following statement in response to new proposed regulations on autonomous vehicles (AV) released by the California Department of Motor Vehicles (DMV). The following can be attributed to Andrea Deveau, Vice President, State Policy and Politics, at TechNet.

**“The California Department of Motor Vehicles (DMV) today released proposed regulations that would establish a path for testing and future deployment of fully autonomous vehicles. The finalization of these regulations will open the door to driverless autonomous vehicles in California, and we applaud the DMV for their effort.**

**Self-driving vehicles have enormous potential — in terms of making our roads safer; enabling mobility for seniors, the disabled, and other Americans; and improving the efficiency of vehicles, which will help alleviate traffic, reduce emissions, and limit costs.**

**TechNet looks forward to providing comments on these proposed regulations through the formal regulatory process so that we can help ensure that advanced vehicle technology can continue to develop.”**

### **About TechNet**

*TechNet is the national, bipartisan network of technology CEOs and senior executives that promotes the growth of the innovation economy by advocating a targeted policy agenda at the federal and 50-state level. TechNet's diverse membership includes dynamic startups to the most iconic companies on the planet and represents more than two million employees in the fields of information technology, e-commerce, advanced energy, biotechnology, venture capital, and finance. TechNet has offices in Washington, D.C., Silicon Valley, San Francisco, Sacramento, Austin, Boston, Seattle, Albany, and Tallahassee.*
