X300CR

### The Westone Bendmaster FT Tremolo

X300PW

### The Westone Bendmaster Deluxe Tremolo

The knife edge design, super accurate fine tuners and a special lock down system, insures that you will be able to "dive" with the best and still come back in tune. The Bendmaster Deluxe will be available replacing the Bendmaster FT shortly.

### Westone Magnaflux pickups

The Magnaflux unbalanced coils on these pickups give you outstanding performance. Very low noise, high output and one of the first coil tap systems that works!

X300PP

Finishes:	X300PP - Pearl Pink X300CR - Candy Red X300PW - Pearl White

Westone  
**PANTERA** Standard Pro

"Pantera" sleek, powerful and fast. When you first pick up one of these guitars, you will know that they are something special. Quite simply, one of the finest guitars you can own. Bendmaster FT fine tune tremolo, Magnaflux unbalanced coil pickups, the well-seasoned Canadian maple body and neck? Yes, it's all here. Combine all of this with the arched, carved maple top and you have one of the hottest new axes of the decade.

Westone  
**PANTERA** Deluxe Professional

You can feel the difference. You can hear the difference. The carved maple top and back makes this one of a kind instrument the most comfortable guitar in the world to own. Play it all the way to the 24th fret. Two full octaves of neck are easy to reach. The cutaway is deep. The neck feels like it just molds into the body. Sustain? You bet! Because the neck is bayonet mounted deep into the body, you get sustain like you have never heard. The OFC (Oxygen Free Copper) pickups are quiet, powerful and packed with dynamics. We selected the Kahler Std. tremolo for use on this masterpiece. We inlaid it into the body for better sustain. The fingerboard is genuine African ebony, not some composite plastic stuff that is supposed to look and feel like ebony but never does. Hand made, lifetime guaranteed and limited production, what more can we say. It's a Pantera.

# Westone **PANTERA** Deluxe Maple

When we set out to design the Pantera Deluxe we made up our minds that it wasn't going to be just another guitar. We wanted it to be the best! We contoured, curved and arched the body to make it hang like a dream. We bayonet mounted the neck and eliminated the heel. This makes all 24 frets accessible. We used the best tuning gears we could find. Then, we inlaid them into the headstock to help reduce the overall mass. They, like the rest of the guitar, carry our Westone Limited Lifetime Warranty. Everything about this guitar is genuine! Genuine African ebony for the fingerboard. Genuine Mexican Abalone for the inlays.

The well-seasoned genuine 5 piece mahogany and maple neck. Genuine Canadian curly maple for the body. The details are impeccable. Even the maple truss rod cover is inlaid into the headstock! The Magnaflex OFC (Oxygen Free Copper) pickups are the most dynamic, noise free pickups that we could find. When you look for the best, you don't have to look any further than the Pantera Deluxe!  
Note very limited production.

Westone  
**PANTERA** Deluxe Bass

The Pantera Deluxe Bass has many of the same features as the Deluxe 6-strings. The same Canadian Maple body and neck. The same body carving for comfort. And, the same goal. Make the finest bass guitar that can be imagined. The Westone necks are considered to be the most stable electric guitar necks that you can buy because of the perfect seasoning. No where is this more important than on a bass. You need the stability for sustain. You need the stability for drive. And, you need the stability for reliability. When you combined this with our exclusive, Westone "Rock Bottom" active EQ system, you get the widest range control of any bass made today. There is only one way to describe this Pantera...perfection.

# WESTONE PANTERA Standards

When we designed the Pantera Standard Series our goal was anything but standard. We integrated the best materials, hardware, finish and Westone craftsmanship with one of the most workable designs we have ever done. The necks are fast and stable. You need the well-seasoned Canadian Rock Maple to do that. The pickups are our super hot Magnaflux Unbalanced Coils. The locking fine tune Bendmaster FT tremolo stays in tune. When you add all this to the Pantera carved maple bodies, you get a better idea of what Westone calls "Standard!"

## Westone **PANTERA** Standard Bases

Whether you're playing our 4 or 5 string models, you can't go wrong. The Pantera Standard Bases have all of the features needed to be considered truly professional equipment. Both the 4 and 5 string models feature carved, arched Canadian maple bodies and Hard Rock Canadian maple necks. Our unique double reinforced truss system makes the Westone necks the most stable in the industry. The Magna Bass pickups have superior dynamic range and some of the most credible specifications in the business. Our Pantera 5-string offers an extra head nut that will allow you to easily switch from a low "D" 5th string to a high "B." We even include the extra string! Pantera, truly professional instruments for true professionals.
