

Before you begin

Thank you for downloading my Bunny Bouquet . If you have any questions, please contact me at stacymarks@comcast.net. Please know I use Cricut Design Space. I am not familiar with other software but will be more than happy to help with general design questions. Enjoy!

Supply list

What you need to complete this project:

- Cricut or personal cutter. Note the directions are written specifically for Cricut Design Space but you can adapt the directions for your own personal machine. Have your machine ready with the score tool, Fine Knife Blade & Deep Knife Blade.
- Strong Grip cutting mat
- Standard Grip cutting mat

Other Materials needed:

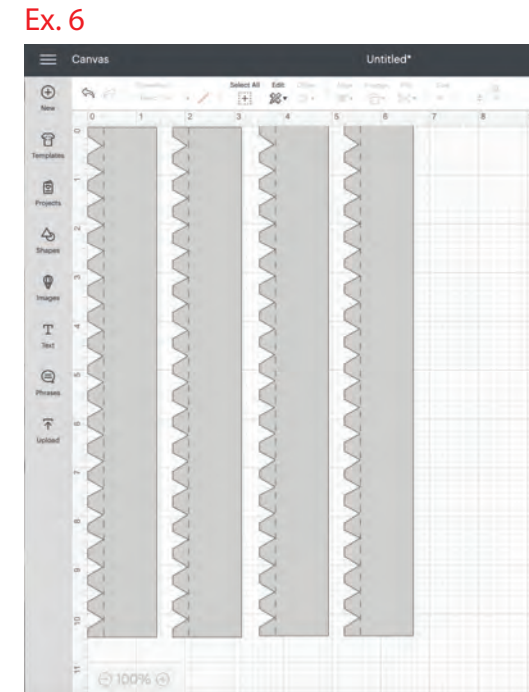

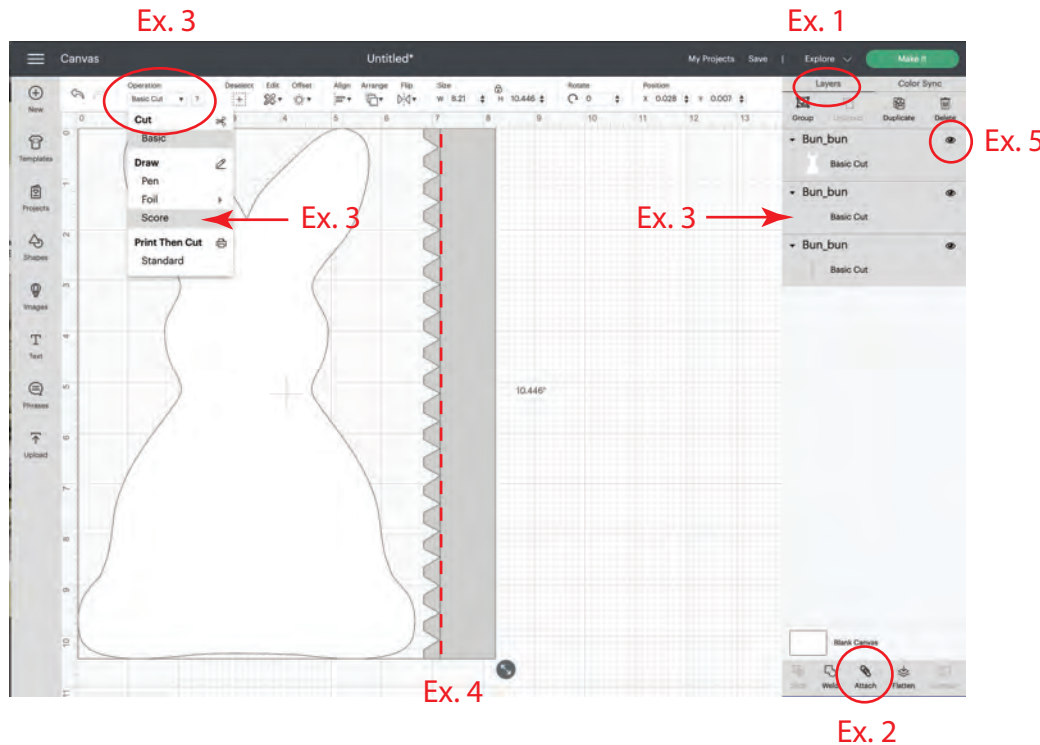

- Chipboard (.050 caliper thick)
- 8 1/2 x 11 inch card stock (your color choice).
- Tacky Glue and/or Hot Glue
- Ribbon
- Scissors
- Paper clips
- Paper flowers and or silk flowers

Score & cut

Open bun_bun.svg in Design Space

- Add to Canvas
- Item will be grouped. You can safely size your bunny and the side piece. They will stay proportional this way.
- In the Layers Panel on the right-hand side of the screen (Ex. 1), click on Ungroup (Ex. 2). Click on second layer and change Basic Cut to score in the Operations Panel (Ex. 3). That is located in the top tool bar that says Operations. Score is located in that pull down menu. The line will change to a dotted line (Ex. 4).
- Again, in the Layers Panel, click on the bunny shape. Click on the eye symbol to the right (Ex. 5). This will hide the bunny (it will not cut).
- Now having the side and the score line selected, click Attach (Ex. 2). Attach is located at the bottom of the layers panel with a paper clip.
- Duplicate side and score line 3 times. You will need 4 of these to create your Bunny (Ex. 6).

Score & cut Continue

- Prepare mat with card stock.
- 65lb card stock works the best.
- Cut using card stock settings & a Standard Grip Mat.
- The machine will score first, then cut.
- Remove from mat.

- Hide the sides by clicking on the eye symbol. Unhide the bunny.
- Prepare mat with chipboard.
- Cut using chipboard settings & a Strong Grip Mat.
- The machine will cut multiple passes.
- Remove from mat.

Assemble

- Gently fold the 4 side pieces on all score lines.
- Fold first side in half. Apply glue to half of the tabs (Photo A).
- Place the fold in the center of the bunny's ears and tuck all tabs under the bunny. Hold to secure. (Photo B)

Photo B

Assemble

- Repeat this process to finish the opposite ear (Photo C).
- Get the second side piece and fold after the 3rd tab. Add glue to the tabs and to the edge of the side piece where there will be an over lap. Use a clip to secure the end until dry. (Photo D)
- Repeat this process with the 3rd side piece on the opposite side of the bunny (Photo E).
- Cut the last side piece so you have 10 tabs. Glue the tabs and both ends to secure the overlap. Hold to secure. Use clips to secure the ends until dry (Photo F).
