## Exclusive Custom Features

### Magnetic Pick-Ups

Adjustable pickups are the best in the industry, precision ground for output and incorporate duty permanent magnets wound for maximum wear.

### Friction Free Vibrato Bridge

Universally adjustable bridge with rollers designed to put a minimum amount of vibrato strain on the strings. This professional bridge is usually found on electric guitars selling for three times as much.

### Warp-Proof Necks

Two ingredients go into the making of a warp-proof neck for your Teisco guitar. The material must be selected hardwood, properly cured. Every Teisco neck is kiln-dried to insure proper curing. To achieve maximum strength, and yet maintain a slim, fast action, Teisco necks are laminated and steel reinforced. Look for these features.

### Precision Tremolo

Rollers act against a spring mechanism, which eventually loses tension. The new Teisco patent-expression type tremolo maintains true harmony and intonation as long as the conventional tremolo which works

### Mar-Proof Finish

The beautiful appearance of your Teisco Electric Guitar is protected by a new, multicoat, mar-proof lacquer which is hand rubbed to a lustrous, durable finish.
