Editable Slides + Instructions for Easy Customization

Editable Slide Instructions

If you would like to create additional slides for this show, the text boxes on the slides below are editable and can be copied and pasted into the existing show as many times as you would like.

To edit the slides, just click on the text box and edit away! The Fonts used on these slides are embedded into this PowerPoint so they should show up on your computer just like they do on mine. However, if something isn't looking quite right, you can also download these Fonts For Free at [TPT](#) and download them to your computer.

The Fonts used are:
[KG Miss Kindergarten](#) (questions)
[KG Miss Kindergarten](#) (answers)

To follow these links right click on the link and choose "open hyperlink".
If you want to match the clip art, you can purchase [Prince Peasapops October/Halloween Clip Art HERE](#), [Prince Peasapops Monster Mash Clip Art HERE](#), [Spiral Peasapops October Clip Art HERE](#), [Spiral Peasapops Kid Monsters HERE](#), and [Spiral Peasapops October Clip Art HERE](#). I cannot include these as editable/moveable images due to copyright restrictions.

Once you have created your own slides you can copy, paste, and move them wherever you would like in the show.

To do this, go to the left-hand side of the screen where you see all the slides.
Click the first slide you want to copy (probably the Ready slide).
Now hold down the Shift key and click the last slide you want to copy (probably the Answer slide).
Now hit Ctrl-C to copy.
Go wherever you want to put the selected slides in the show and click between the slides where you want to insert your slides.
Now hit Ctrl-V to paste the slides you copied.

If the slides show up blank when you paste them, just hover over the first slide you pasted and choose "Source Formatting" from the Paste menu. Then the slides will look just like the originals.

If you make a mistake, stop... breathe... And hit Ctrl-Z. This will undo the last action so you can retrace your steps. (This strategy works very well for kids in the computer lab too!)
