

With a scene increasingly dependent on the commercial suicide it is as if the constant acceleration imposed by this age means that one can only perceive the effect of movement, but not the cause. Common Series offers a skyline of the electronic musical village. The dividing line between natural and artificial is constantly being reinvented and converted into a Dantesque travel about the discovery of the fantastic within the real.

Produced by:
GoldFinger & Richard Edogawa

© Music by Erroi
B1 Live Session GF&R.E. (Rome, May 11th 2014)

It is claimed that Three is the perfect number.

Many fields of human thought have reasoned concerning this number: Religion, Literature, Philosophy. It's an easy number to reach but difficult to cross. Once you cross the Three everything takes other forms.

It's a pass, there are those who will perish and those who stops and observe. Some believe that their work is finished there. But there are also those who consider it the closest point to the sky and the stars and draw the strength to continue their work.
