THIS IS IMPORTANT FOR US

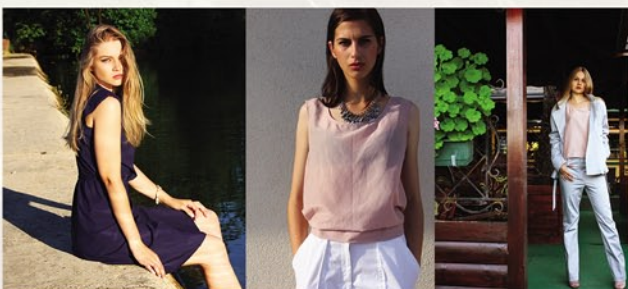

"With Respect for People and Planet"

High quality materials, quality craftsmanship, refined and timeless designs make this brand. Not a fashion for a season, but rather clothes that can be worn over and over again for many years with pleasure.

We use **materials that are biological, ecological recycled or upcycled.**

While producing the timeless ready-to-wear collections, Inti Ferreira gives great importance to ethical manufacturing process.

Ultimately, the versatility is also a characteristic of Inti Ferreira. The pieces can be worn in the tram as well as in business meetings or at the cocktail party. - Chic, practical and comfortable.

SLOW FASHION - A GROWING MARKET

From the Niche to the Mainstream

The sustainable movement did not stop for the Fashion either. More and more customers prefer quality rather than quantity and also demand more transparency. Fashion labels that renounce to harmful manufacturing processes and rather produce in a fair and sustainable way are gaining in popularity. Even reputed international fashion schools are establishing new courses and graduation programs focused on sustainability and fairness. According to surveys, almost half of all German consumers want more sustainability in the textile and fashion industry. **Slow fashion is hence not a trend, but a fundamental rethinking.**
