

# SPREADSHEET SOLUTIONS

Creating business solutions through custom spreadsheets

We understand how important business processes and systems are, and we want to enable all businesses to achieve their best possible results. Large businesses have the advantage, as they can spend large amounts of money on custom made programmed business software. Small and medium businesses can't always afford the exorbitant fees, so they settle for a 'standard' product, and then try and squeeze their business into the mould required by the software. This causes companies to lose their competitive advantage as they are all working with the same 'one size fits all' strategy.

We want to give small and medium businesses the same advantages that the larger firms enjoy, but we want to make it affordable to everyone. We use Excel to achieve this, as most people already either use or have it. The problem is that most people underestimate what Excel can do, as they do not have the expertise that we have, in order to produce outstanding spreadsheets and software.

SPREADSHEET SOLUTIONS

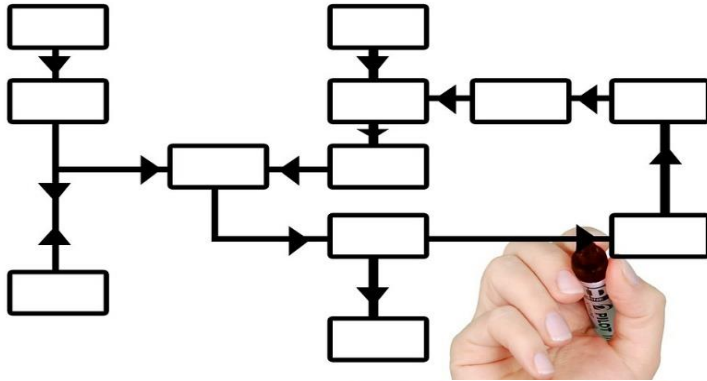

Creating business solutions through custom spreadsheets

We specialise in creating custom solutions, depending on your needs and requirements, but we do find that there is often a need for a 'standard' product. This has led us to create some standard product, which we have on sale in our store, but please don't limit us to what you see there!

[www.spreadsheetsolutions.biz](http://www.spreadsheetsolutions.biz)

Scroll down and take a look at some of the product and services that we offer, and please use the links provided to visit our website for more information. We would also love it if you connect with us (or Richard, our Director) on social media, where we often have exclusive offers.

If you think spreadsheets are just for basic calculations or to store data, think again! There are countless ways that the right, tailor made spreadsheet can enhance your business and save you time, money and effort. We create custom made business software for small, medium and large businesses with the cunning use of Microsoft Excel. Excel is not just for accounts, it is extremely versatile. We use our company management, project management and sales experience, combined with our knowledge of Excel, to create custom made software at a fraction of the price of bespoke programmed software. We like nothing more than enabling a company to decrease its workload, while increasing its productivity.

We can help you to track, manage and analyse your processes.

We realise that we can not list all the possible applications for our spreadsheets, as we are constantly discovering new ways that we can empower business owners, but we do have some suggestions that can get you inspired. Click on the image to the left in order to visit a page on our website that has a list of possible suggestions.

Simple. Easy to use. Unique. Unlocking potential.

Just like our spreadsheets.

We have solved many business specific problems using Excel, and we have an ever growing list of such successes, which our clients enjoy. Click on the image to the left to see this ever growing list of custom solutions which we have provided.

Spreadsheet Solutions was started to provide small and medium sized businesses with an alternative to programmed custom business software. Please don't think of our products as just spreadsheets, they can be made to be so much more than that. By clicking on the image to the left, you can visit the page which shows how Excel can be used to create custom business software. This is perfect for SMEs as it is much more cost effective.

## Calling all BUSINESS CONSULTANTS

Contact Richard to discuss a relationship where we can help you offer your clients even more.

[spreadsheetsolutions.pw](http://spreadsheetsolutions.pw)

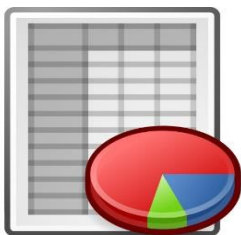

We don't only provide spreadsheets, but we provide business advice too, in order to make sure that your custom spreadsheet is as productive as it can be. If you are a business consultant, please do click on the image, we'd love to build a relationship for potential referrals.

# SPREADSHEET SOLUTIONS

Creating business solutions through custom spreadsheets

If you would like to see a 'standard product', we do have some in our online store. Click the image to see what we have available. You can view demonstrational videos, download a PDF brochure, or even download a free 30 day trial of each of the products. If you would like to purchase any of these products, you can do so from the store, otherwise, use them to inspire you to contact us for your very own custom made solution. We have specials on these products from time to time, and we notify people about this using social media and our mailing list.

## Do you use Excel?

Do you already use Excel? Why not send us your Excel spreadsheets and see what we can suggest as a potential upgrade? We often find people under-utilising Excel, and we can often get more results from a spreadsheet, sometimes without requiring any additional data from you.

## What our clients say about us:

**“Professional, thorough and efficient, but flexible, with personal service excellence!”\***

\* Based on various customer reviews

Don't just believe our word for how helpful our spreadsheets are, take a look at what our clients have to say. Click on the image to visit our Testimonials page. We are a small company, and we take pride in offering the best customer service that we can. We are only happy when our clients are.

So you have now seen what we have to offer, but there is even more on our website. Free downloads, PDF brochures, custom Excel training and our process explained, to name a few. Please come and visit our site if you think that we could be of any assistance. You can use the links below to visit our social media pages, or to sign up for our monthly email newsletter.
