

# Go Green! 5 Collaborative Project Ideas

Presented by Cherie Herring

How can you make your lessons more meaningful? How can your students use

Green Screen to demonstrate their learning? Using Green Screen in the classroom is easy, economical and appropriate for all grade levels and subject areas!

# What is "green screening"?

Chroma keying is a special effects / post-production technique for compositing two images or video streams together based on color hues. Green Screen allows you to create a video using an image or video for your background. The possibilities are endless!
