WORK EXPERIENCE

Apr 2017 – Present   **Python/Django Developer**   LANshark Consulting Group, LLC (http://lanshark.com)
- Initially started as one of the developers who were charged to develop web applications using Django framework but later on took over majority of the developments.
- Created a design using Bootstrap 4 components for better user interface
- Developed API endpoints using Django REST Framework and created tests along with it

Mar 2017 – Apr 2017   **Django Backend Developer**   Joe Coffee App (http://joecoffeeapp.com)
- Developed majority of the API endpoints used to communicate with the mobile app. The endpoints range from signing up for an account to ordering a food/drink, up until the payment process.
- Implemented Stripe payments with Django REST Framework to handle transactions involving payments

Oct 2016 – Mar 2017   **Python/Django Developer**   FFL Design (http://ffldesign.com)
- Built the time tracking feature for employees
- Created series of functions to sync QuickBooks data into the system using the API

May 2016 – Nov 2016   **Django Backend Developer**   Shoporama
- Built and managed the backend REST API of the E-commerce system
- Developed all API endpoints to be used by both sellers and customers
- Integrated Mangopay as payment gateway of the web app by using the API

Dec 2015 – Oct 2016   **Full Stack Django Developer**   MapJam (http://mapjam.co.ke)
- Updated the Django version to a later version and implemented the new design in the homepage. I also developed new features as well as deploy the project to a Linode and a DigitalOcean server.

Dec 2015 – May 2016   **Python/Django Developer**   Future Business Inc.
- Worked hand-in-hand with a lead developer in doing code maintenance tasks for the time tracking application.
- Created a separate admin module to communicate with the time tracking feature using Django REST framework

Jan 2016 – Mar 2016   **Full Stack Django Developer**   Lazada South East Asia Pte Ltd
- Built an exclusive site to handle admin functions for all the deals made in the company.
- Built the site using Django along with MySQL and Bootstrap

Feb 2015 – Nov 2015   **Python/Django Developer**   Print All Over Me (http://paom.com)
- Developed the E-commerce app from scratch up until production ready.
- Implemented Django REST framework to handle API calls to and from the system.

Feb 2015 – Nov 2015	**Python/Django Developer**	Rentez-vous (https://www.rentez-vous.com)

- Developed minor updates and done a lot of bug fixing all throughout the system.

Nov 2014 – Jan 2015	**Python/Django Developer**	KuwaitNet (http://kuwaitnet.com)

- Charged to develop new applications/websites based on the requirements of multiple clients

Oct 2013 –Aug 2014	**Python/Django Developer**	Join'em LLC (http://joinem.com)

- Performed optimization in certain features for better user interaction and system design.
- Collaborated closely with fellow developers in implementing new features as well as fixing bugs in the system.

Apr 2013 – Jul 2013	**Lead Django Developer**	Seven Seas Cruising Association (https://ssca.org)

- Led the backend team in categorizing tasks for optimal development
- Managed and reviewed all the commits in the repository coming from the backend team before merging into the main branch.
- Created a separate admin interface to allow users to make changes in the database that require admin access.

Dec 2012 – Mar 2013	**Python/Django Developer**	Carte D'or

- Started and developed the web application from scratch until production ready.
- Implemented social media logins, matching feature, love questions, and setup the web application in a dedicated production server.

Jan 2012 – Jan 2014	**Full Stack Software Developer**	Ingenuity Technology Consulting

- Worked as a web developer specializing in Python and Django development.
- Developed applications in Agile/Scrum methodology
- Wrote easily maintainable code for multiple clients whether solo or in a team development.

Jan 2012 – Jul 2012	**Full Stack Django Developer**	Bixly

- Improved system performance for multiple clients as well as upgrade interfaces and bug fixes.
- Consulted with customers on a regular basis on project status and further feature development.

EDUCATION

2010	**Bachelor of Science in Information Technology**
	Ateneo de Davao University
