 **NORTH**
• DEFENDERS •

EVERY 34 NORTH DEFENDER HAS A UNIQUE STORY.

At 34North Defenders, our team imports restored and custom Land Rover Defender 90, 110, and 130 models from around the globe that are timeless and unique to each client.

We emphasize the journey and, throughout the process, work side-by-side with both our clients and suppliers to create a memorable vehicle that reflects every client's personality and style. From basic restoration to full frame-off restoration, no two vehicles are the same.

Every Defender has a story, and we pride ourselves on continuing that story with each client.

FROM THE STREETS OF NEW YORK
TO THE SANDS OF THE SAHARA,
WITH OVER 25 YEARS OF HISTORY,
OUR DEFENDERS HAVE SEEN IT ALL.

INDIVIDUALLY SOURCED

Our vehicles are hand-selected
from areas with the most
favorable dry climates, including
southern Europe or S. Africa.

SAME LOOK, NEW LIFE

Each owner provides a new life
for the next 25 years and beyond
through rebuilds and restoration.

OUR CUSTOMER-FIRST APPROACH TO REBUILDS

Our rebuilding process centers on client involvement. We want every client to be a part of the journey from beginning to the end—not just order and deliver a car.

FOUR CATEGORIES WITH **TIMELESS** CLASS, STYLE, AND FEATURES

While Defenders stylistically fall into four main categories, the customization options are endless and tailored to our client's styles and personalities.

34.0757° S, 18.8433° E

HERITAGE

Timeless styling, classic colors, simple design.

URBAN

Bold styling, modern features, road worthy performance.

EXPEDITION

ENDLESS CUSTOMIZATIONS
AS UNIQUE AS YOU

Traditional

Modern

Heritage

GRILLS

As the face of each build, the grill expresses the characteristic style of your Defender. With versatility in color and light bezel details, our team will work with you on finding the right combination to reflect your vision.

WHEELS

With endless options, a few wheels we commonly utilize are Wolf, Kahn, Boost, and Sawtooth. The classic Wolf wheels are made from heavy-duty steel, one of Land Rover’s strongest wheels, while the others are made from alloy.

Puma

HOODS

While some Defenders utilize traditional, flat hoods, ‘Puma’ hoods feature a raised center section to accommodate larger engines. Since we tailor all our vehicles to our client’s aesthetic, Puma hoods can be fitted to all Defender models we offer.

MOTORS

The 200 & 300TDI are standard engines you will find in our vehicles; we utilize the 300 TDI in 1994 and later models. The Cummins 2.8 and Chevrolet LS3 are two common upgrade options; however, there are additional engines we can discuss.
