WA
Architecture
Awards

The 2013 Australian Institute of Architects Western Australian Architecture Awards provides an annual opportunity for the public and professional acclaim of architectural works built in Western Australia, designed by Corporate Members of the Institute which have achieved a high standard of architectural merit.

AWARDS STRUCTURE

Integrated Hierarchical Program

The Australian Institute of Architects National Architecture Awards is an integrated, hierarchical program resulting in annual awards at National, Chapter and in some Chapters, Regional levels. Awards in each category are based on a three-tier system, in decreasing order of merit.

Named Award

The first and highest award in each category; the award is given to the work judged to be the most significant for the advancement of architecture in each category. Juries shall determine a Named Award in every category where at least 5 entries are eligible for consideration.

Architecture Awards

The second tier is the 'Architecture Award'. This is a work of excellence demonstrating consummate architectural skill that contributes to the advancement of architecture. Projects awarded an Architecture Award are the best projects in each category that have not won the Named Award. An Architecture Award may be given regardless of the number of eligible entries received in a category. The Juries may award one or more Architecture Award(s) in any category.

Commendations

The third tier of recognition is a 'Commendation'. This is for projects of special merit, demonstrating significant architectural skill. A Commendation may be given regardless of the number of eligible entries received in a category. The Juries may award one or more commendation(s) in any category.

AWARDS CATEGORIES

Architecture Awards will be considered in the following categories:

PUBLIC ARCHITECTURE

Sponsored by Monduluce

Projects within this category must be predominantly of a public or institutional nature, generally falling within BCA Class 9.

RESIDENTIAL ARCHITECTURE – HOUSES

Sponsored by Bravvo

Projects within this category must be individual and residential in nature, generally falling within BCA Class 1a.

RESIDENTIAL ARCHITECTURE ALTERATIONS & ADDITIONS

Sponsored by Homeguard

Projects within this category must be individual and residential in nature, generally falling within BCA Class 1a.

RESIDENTIAL ARCHITECTURE – MULTIPLE RESIDENTIAL

Sponsored by DULUX

Projects within this category must be residential in nature, generally falling within BCA Class 1b, 2 or 3a, c or d. Buildings falling within BCA class 3b will generally be considered under Category 4: Commercial Architecture.

HERITAGE

Sponsored by LandCorp

This category is for any built conservation project or study developed in accordance with the Australian ICOMOS Burra Charter, or any adaptive reuse of a heritage structure.

URBAN DESIGN

Sponsored by iGuzzini

Projects in this category may be single buildings, groups of buildings or non-building projects, including studies or masterplans, of public, civic or urban design in nature.

Awarded projects must have enhanced the quality of the built environment or public domain or have led to the betterment of the broader city for the general community.

COMMERCIAL ARCHITECTURE

Sponsored by AUSTIM

Projects eligible for this category must be built primarily for commercial purposes, generally falling within BCA Classes 3b, 5, 6, 7 and 8.

INTERIOR ARCHITECTURE

Sponsored by THE LAMINEX GROUP

Projects in this category will be interior spaces and environments within a new building or the refurbishment of an existing building.

SMALL PROJECT ARCHITECTURE

Sponsored by TOTAL PROJECT SOLUTIONS

Projects in this category will be those considered to be “small” in terms of area or budget as determined by the jury. Projects are recognised that have been constrained by space or cost restrictions, but have achieved a level of invention, creativity and craftsmanship beyond these constraints. This category can accommodate projects which might be overlooked against larger scale projects in other categories. Projects of all functional types may be considered.

SUSTAINABLE ARCHITECTURE AWARD

Sponsored by Georgiou

This category recognises projects which excel as architecture, and also display innovation and excellence in terms of environmental sustainability. Juries will assess the environmental performance in terms of the Australian Institute of Architects Environment Policy (Supplement: Sustainable Design Strategies for Architects)

Members are not able to enter this category directly. All Awards entries may be considered in this category. Entrants are required to provide information regarding the sustainable design of the project as part of the entry process.

Other non-building projects that contribute to the advancement of architecture and to the goals outlined in the Australian Institute of Architects Environment Policy may also be considered for this Award.

ENDURING ARCHITECTURE

Buildings of at least 25 years of age may be considered for this award.

Buildings nominated need not be previous award winners but must be buildings of outstanding merit that, considered in contemporary context, remain important as high quality works of architecture. Projects should be assessed in terms of national significance, technical advancement, innovation for its time, symbolic significance and/or creative leadership.

COLORBOND® AWARD FOR STEEL ARCHITECTURE

Sponsored by BlueScope Steel

This category recognizes projects in which steel products play a significant role in the architectural solution and which exemplify innovation in the use of steel products.

BlueScope Steel has the naming rights for this award, but use of BlueScope products, including Colorbond, is not a criterion for selection or award.

MONDOLUCE ARCHITECTURAL LIGHTING AWARD

Sponsored by Mondoluce

As part of the WA Chapter Architecture Awards program Mondoluce will be awarding a special prize for the creative and innovative use of lighting in building projects or particular aspects of a project where lighting has been applied. Entries in all categories are eligible for this award.

THE GEORGE TEMPLE POOLE AWARD

The George Temple Poole Award is presented each year to the project judged most worthy from the named award winners in each category (excluding the Colorbond Steel and Lighting Awards). Named Award winners are eligible for adjudication by a Jury of four consisting of the President (or his representative) of the WA Chapter, the Chairman of Juries, an architect and a representative from the Major Sponsor, Colorbond. There is one winner of the Award. An engraved sculptured memento is presented.

NATIONAL AWARDS PROGRAM

Where a Named Award and an Architecture Award has been made they are submitted in turn for adjudication under the National Architecture Awards program. Award winners in Public Architecture are submitted for the Sir Zelman Cowan Award, Residential the Robin Boyd Award, Multiple the Residential Frederick Romberg Award, Heritage the Lachlan Macquarie Award, Urban the Walter Burley Griffin Award, Commercial the Harry Seidler Award, Interior the Emil Sodersten Award, the David Oppenheim Award for Sustainable Architecture, The Nicholas Murcutt Award for Small Project Architecture and Colorbond® Award for Steel Architecture. The National Awards Jury retains the sole right to determine the category applicable for each submission.

RECOGNITION

Each Named Award, Architecture Award and Commendation shall be recognised by certificates of the Chapter for the year in which the project was assessed and will be presented to the architectural practice responsible for the design. A plaque may, with the owner's consent, be affixed to the structure of each named award-winning project.

ADJUDICATION

A Jury of three/four people comprising two/three architects and one lay person assesses submissions in each category. The Juries are, after the closing of the Architecture Awards nominations, selected where possible from recipients and jurors of previous Architecture Awards or Design Competitions of the Australian Institute of Architects. Architects associated with any nominations are not selected for a Jury. In assessing an Architecture Award the Juries consider the following criteria:

CORE EVALUATION CRITERIA

The key criteria to be used by the jury for judging entries in each category are:

Conceptual framework

Underlying principles, values, core ideas and philosophy of the project.

Public and Cultural Benefits

The amenity and concepts contributing to the public domain.

Relationship of Built Form to Context

Concepts engaged with new and pre-existing conditions.

Program Resolution

Functional performance assessed against the brief.

Integration of Allied Disciplines

Contribution of others, including engineers, landscape architects, artists and other specialists to the project outcome.

Cost/Value Outcome

The effectiveness of decisions related to financial issues.

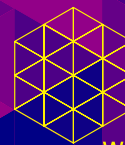

Sustainability

The benefit to the environment through design.

Response to Client and User needs

Additional benefits interpreted from the brief, serving the client or users and the community.

The Juries are required to submit to the President, in a form suitable for publication, a written critique of nominations, with particular emphasis on any nomination granted a Named Award, an Architecture Award or a Commendation.
