The Gourmet Division of Hutzler

As the gourmet division of Hutzler Manufacturing Company, we are proud to be celebrating our 85th Anniversary. It is you, our valued customer, who has given us this opportunity to continue to innovate and manufacture kitchenwares that are enjoyed day after day, spanning the generations.

We began in 1938, at a time when metal raw materials were scarce. Necessity required our founder, Lothar Hutzler, a new immigrant to the United States, to innovate. He began by molding basic housewares from plastic — something that had never been done before at that time. We were the first to create funnels, cookie cutters, and even a 4-sided grater from plastic.

Since those early days, we have become experts in designing and manufacturing plastic kitchenwares. Our factory floor in Connecticut hums to the sounds of our molding machines. Still family owned and operated, we maintain our rich history of producing original housewares that stand the test of time. We are dedicated to providing tools that simplify food preparation and keep food fresh longer.

Thank you for supporting us in all that we do. We greatly appreciate your business!
