- Warmouth Neck & Sperzel Locking Pegs**
 The Pacifica 604W and 904 both feature top-quality Sperzel locking tuning machines for precise and reliable tuning. The 904 additionally features an American-made Warmouth neck for clean, comfortable fingering. The neck also has a relatively thick heel for solid, full bodied sound.
- "Vintage Custom" Tremolo (904)**
 Wilkinson VS100 Tremolo (604W, 812W, 812WX)
 The "Vintage Custom" tremolo system is a highly refined version of the traditional type tremolo featuring a two-point fulcrum. The Pacifica 904's tremolo is cast from solid steel for a refined sound with improved stability. The tremolo featured on the Pacifica 812W, 812WX, 604W is a Wilkinson VS100 tremolo system made by Gotoh.

AEX

The AEX500 and AEX500 combine a unique blend of tradition and technology to bring the quality and tone of both acoustic and electric

guitars into a single instrument. Both instruments incorporate a floating neck pickup with the same acoustic bridge pickup as found in our APX series guitars. These hybrid acoustic/jazz guitars can produce both straight-ahead jazz and accurate acoustic tone. The ability to blend both pickups together opens up vast new possibilities in tone creation.

Three new models, the 520, 502 and 500N, expand the AEX line. The 500N is a nylon string guitar is fitted with our acoustic bridge pickup for an elegant classical sound. The 520 and 502 are both electrics with Alnico's "Dog Ear 90" pickups on the 502 and small humbuckers on the 520 for a great jazz sound.

AEX500N Controls

The AEX500N is equipped with a 3-band graphic equalizer that offers precise tone control right at the playing position.

AEX1500 Piezo Pickup

Mounted in the bone and ebony bridge, the Piezo pickup delivers full crisp acoustic sound. Highly responsive, even the subtlest picking and attack nuances will be reproduced accurately.

AEX1500 Floating Humbucker Pickup

The Mini Humbucker produces a warm and expressive sound that is full of range and depth. A floating mount is used to allow the top of the guitar to vibrate freely insuring excellent acoustic sound.

AEX1500 Controls

Pickup selection is made possible by a 3-way selector. Separate controls for the pickups consist of a 3-band linear EQ with variable mid range (400Hz-2kHz) for the piezo pickup and a tone control for the humbucker. The 3-band EQ controls allow extensive tone control of the piezo pickup right at the playing position. There is also a MIX control which permits balance of the two pickups creating a broad range of sonic possibilities.

AEX500 Pickups and Controls

The AEX500 incorporates the same pickup and control system found in Yamaha's APX line. The balance between the high quality piezo-electric pickup, mounted in the bridge, and the magnetic pickup offers sound that is nothing less than superb. A 3-band graphic EQ provides extended tonal control right at the playing position.

AEX500N Piezo Pickup

Full, crisp acoustic sound is produced by means of a highly responsive piezo pickup mounted in the bridge of the AEX500N. The warmth and clarity of the nylon strings along with subtle picking and attack nuances creates a sound that is truly exquisite.

SG/SA

The tone and playability of the original SG is still alive in the SG700S and SG500B. Both models possess beautiful arched top bodies covered with exquisite finishes. Along with gold hardware, the SG700S features beautiful inlay work on the neck and headstock exhibiting Yamaha's meticulous attention to detail. Our master craftsmen have refined the semi-hollow bodied guitar to perfection with the SA2200. This meticulously crafted guitar features Alnico humbucking pickups for full, fat tone and individual coil splitters for added tonal versatility.

TRB

The TRB series is a product of Yamaha quality craftsmanship and technological vision. Developed in close collaboration with some of today's leading bassists, the TRB series basses are designed to exceed the exacting demands of sound and playability for discriminating players. Designed specifically for John Patitucci, his signature model features a custom sculptured body of highly figured maple, ash and alder, a six string bolt-on 34" scale neck, active electronics, custom inlay and gold hardware. The balance of the TRB line offers 4-, 5-, or 6-string models all featuring 35" scale bolt-on necks with slightly narrower widths for greater response and improved playability.

RBX

If raw, sonic power is what you want, the RBX line delivers it. Rock solid alder bodies provide solid tone. Fast action 24-fret necks along with wide body

cutouts offer extended playability. Along with the new 760All we are proud to introduce the John Myung Signature Model. This 6-string bass incorporates an active 5-control system that provides precision control over the tone of the bass.

• **New Active 3-band EQ (JM Model)**
The active control system featuring 3-band EQ gives the RBX series basses even more tonal versatility. Precise control provided by the continuous mid-range EQ control offers wider tonal possibilities and lets you find that sweet spot with ease.

• **Active 4-Control System (7600 series)**
Full bodied lows to brilliant highs, and precise control over the RBX's entire sound is achieved through the use of separate controls for bass, treble, master volume, and mix.

DG Amplifiers

ECM (Electronic Circuit Modeling) technology allows Yamaha's DG series Guitar Amplifiers to capture the essence of tube tone. Starting with the DG1000 digital preamp, its user-friendly interface provides an instinctively familiar approach to sound creation and a truly flexible tonal palette from which to create rich soundscapes. That same creative power is now offered in a full lineup of amplifier configurations. The same preamp section as found in the DG-1000, is enhanced with onboard digital effects, high-quality power amps, Celestion speakers, and mounted in rugged chassis. Up-to-date technology and classic tone, the best of both worlds rolled into one.
