

**IN THE TIME
IT TAKES YOU
TO READ THIS,
SOMEONE'S BIKE
WAS STOLEN.**

A bike is stolen every 7 seconds. And while thousands of bikes are recovered by the police each year, very few are returned. Why? Because there's no way to identify the bikes' owners.

Here's the good news. Project 529 works directly with thousands of police departments, universities, apartment complexes and bike shops/manufacturers, using the only global bike registration service, to return bikes to their rightful owners. In fact, Project 529 registered bikes are nine times more likely to be returned.

**Keep your bikes safe in the 529 Garage
the largest community-powered bike recovery service.**
