Champignon – Pouf
Design by Front

Drawing inspiration from the surprising and unique shape of mushrooms, Front imagined a strikingly singular pouf design that sprouts from the ground. Sitting on its cap, the body interacts with the soft shape that adapts to the user's position. The swivel base further heightens the sense of weightlessness it delivers. Bring a bit of nature into your interior: let your guests go hunting for mushrooms or plant one in your room for an eye-catching statement.

FRONT

Sofia Lagerkvist and Anna Lindgren are the members of the Swedish design studio Front. Their works are based on common discussions, explorations and experiments and they collaborate in all projects from initial ideas to the final product. Front's design objects often communicate a story to the observer about the design process, about the material it is made of or about conventions within the design field.

Demonstrating their innovative and experimental mindset, Front have been known to assign part of the making of their designs to animals, computers or machines.

They have made constantly changing interiors, created objects with explosions, robotic furniture and a range of furniture inspired by their fascination with magic.

Front's work is represented at MoMA, Victoria & Albert Museum, M+, Nationalmuseum, Vitra Design Museum and Centre Pompidou.
