- NSS - NOT SOLD SEPARATELY
- NOTE 1 - 120926 is interchangeable with 115825 by also using 110810 Output Shaft Side Gear. This conversion can be applied to 34/38D if power divider is also converted to D340/400 or D341/381/401.
- NOTE 2 - Axles built prior to May 1, 1982 use 95207 self-locking nut. Later models use 118806 slotted nut plus 118807 roll pin.
- NOTE 3 - Output Shaft Kit 115123 now contains shaft p/n 128736 which doesn't use an output shaft bushing. Refer to Technical Information Bulletin #93-06.
- NOTE 4 - For earlier style Output Shafts 46647 and 98603, use 44178 Snap Ring.
- NOTE 5 - Order Helical Gear Conversion Kit 113561.
- NOTE 6 - Early model axles use a ball bearing on input shaft. To convert ball bearing to taper bearing, use Kit 86987 which contains items 88, 90 & 91.
- NOTE 7 - 102609 remains available for early pump models built with Woodruff keys.
- NOTE 8 - Production Axles used 95206 self-locking nut; service gear sets now use 118854 slotted nut plus 118855 roll pin.
- NOTE 9 - Refer to Technical Information Bulletin #93-04 for more details.

NOTE: THREAD LOCKING LIQUID/DIFFERENTIAL CASE HALVES

When assembling differential case halves in Rockwell International® axles, a thread locking adhesive should be used. The recommended procedure is as follows:

1. Wipe excess oil and residue from the threaded holes in the case. The holes should be relatively oil-free.
2. If **new bolts** are used, a yellow coating of Dri-Loc™ should appear on the threads. Assemble the case with these coated bolts to the required torque.
3. If the **original bolts** are reused or **regular bolts** without Dri-Loc™ are used, Rockwell® Part No. 2297C3747 should be used as a thread locking adhesive. **Apply the adhesive to the differential case holes only.** Thread the bolts and tighten to the required torque.

IMPORTANT: Do not apply Rockwell® Part No. 2297C3747 to Dri-Loc™ coated bolts. Refer to Rockwell® Service.

NOTE: THREAD LOCKING LIQUID/DIFFERENTIAL CASE HALVES

When assembling differential case halves in Rockwell International® axles, a thread locking adhesive should be used.

The recommended procedure is as follows:

1. Wipe excess oil and residue from the threaded holes in the case. The holes should be relatively oil-free.
2. If **new bolts** are used, a yellow coating of Dri-Loc™ should appear on the threads. Assemble the case with these coated bolts to the required torque.
3. If the **original bolts** are reused or **regular bolts** without Dri-Loc™ are used, Rockwell® Part No. 2297C3747 should be used as a thread locking adhesive. **Apply the adhesive to the differential case holes only.**
Thread the bolts and tighten to the required torque.

IMPORTANT: Do not apply Rockwell® Part No. 2297C3747 to Dri-Loc™ coated bolts. Refer to Rockwell® Service.

NOTE: THREAD LOCKING LIQUID/DIFFERENTIAL CASE HALVES

When assembling differential case halves in Rockwell International® axles, a thread locking adhesive should be used. The recommended procedure is as follows:

1. Wipe excess oil and residue from the threaded holes in the case. The holes should be relatively oil-free.
2. If **new bolts** are used, a yellow coating of Dri-Loc™ should appear on the threads. Assemble the case with these coated bolts to the required torque.
3. If the **original bolts** are reused or **regular bolts** without Dri-Loc™ are used, Rockwell® Part No. 2297C3747 should be used as a thread locking adhesive. **Apply the adhesive to the differential case holes only.** Thread the bolts and tighten to the required torque.

IMPORTANT: Do not apply Rockwell® Part No. 2297C3747 to Dri-Loc™ coated bolts. Refer to Rockwell® Service.

NOTE: THREAD LOCKING LIQUID/DIFFERENTIAL CASE HALVES

When assembling differential case halves in Rockwell International® axles, a thread locking adhesive should be used.

The recommended procedure is as follows:

1. Wipe excess oil and residue from the threaded holes in the case. The holes should be relatively oil-free.
2. If **new bolts** are used, a yellow coating of Dri-Loc™ should appear on the threads. Assemble the case with these coated bolts to the required torque.
3. If the **original** bolts are reused or **regular bolts** without Dri-Loc™ are used, Rockwell® Part No. 2297C3747 should be used as a thread locking adhesive. **Apply the adhesive to the differential case holes only.** Thread the bolts and tighten to the required torque.

IMPORTANT: Do not apply Rockwell® Part No. 2297C3747 to Dri-Loc™ coated bolts. Refer to Rockwell® Service.

NOTE: THREAD LOCKING LIQUID/DIFFERENTIAL CASE HALVES

When assembling differential case halves in Rockwell International® axles, a thread locking adhesive should be used. The recommended procedure is as follows:

1. Wipe excess oil and residue from the threaded holes in the case. The holes should be relatively oil-free.
2. If **new bolts** are used, a yellow coating of Dri-Loc™ should appear on the threads. Assemble the case with these coated bolts to the required torque.
3. If the **original bolts** are reused or **regular bolts** without Dri-Loc™ are used, Rockwell® Part No. 2297C3747 should be used as a thread locking adhesive. **Apply the adhesive to the differential case holes only.** Thread the bolts and tighten to the required torque.

IMPORTANT: Do not apply Rockwell® Part No. 2297C3747 to Dri-Loc™ coated bolts. Refer to Rockwell® Service.
