

Total Knee Arthroplasty

The partner you trust

EgiFix Total Knee Prosthesis Product Overview.

- The new product T-Free total knee prosthesis from EgiFix Company is an anatomical type implant based on the latest technology best adjustable to human body
- Designed flexion angle up to 150°
- The product supplies both posterior stabilized and cruciate retaining implants with multiple size available respectively.
- Open intercondylar design reduces the bone resection
- Deeper trochlear recess enables good contact with patella in high flexion and prevents dislocation
- Single radius of tibial insert and femoral condylar effectively increase contact area and assures the motion stability of ligaments
- The design of the tibial plateau distributes load evenly and enhances anti-rotation
- The surgical instruments are designed based on anterior reference theory, and their perfection

Indication

- Rheumatoid Arthritis
- Osteoarthritis
- Stiff knee
- Other problems suitable for TKA treatment

Contraindication

- Infection (acute or occult, general or local)
- Severe osteoporosis
- Sever obesity
- fracture around the knee
- Hyperflexion of knee, flexion contracture
