UASLP
MEDICINE SCHOOL

Background

Idem is a program design to intervene in complex environments affected by different conflict elements as inequality, poverty, malnutrition or lack of health and education

Based on positive peace, the program pretends to create community schemes based on participation, accompaniment, and sustainability, where the conflict derived even more from lack of education or health than unemployment or murders

[Trash & water] **[Trash & Nutrition]**

PEACE (developed methodology to the intervention)

P	participatory planning	Based on researches markers and community needs
E	evaluation of the risk	Scientific priorization
A	alliances	Stategic work with autorities and organizations
C	control of the risk	Intervention based on previous elements
E	expansion	Diffusion to similar communities

[PUSH Team]

Agendas each of them is related to a type of security

Yellow	Blue	Indigo	Green	Pink
	Food safety	Comummunity Security	Environmental Security	Socio-economic Security

Ten domestic rainwater harvesting devices were installed in two indigenous communities.
I analyzed the impact of a Rainwater harvesting pilot project comparing the difference between the samples
- **>Intrument elaboration**
- **>Sampling**
- **>Data processing**
- **>Report**

[Tocoy functonal rain water harvesting device]

[Double Tank]

The Green agenda was segmented into two groups:
- >environmental management
- **>community ecology**

My main contributions were to the second one, to the **Rainwater harvesting project**

[unnconnected Rainwater harvesting]
