

Drop In Reviews PRO v.3.2

USER MANUAL

"Thank You For Purchasing "**Drop In Reviews PRO v.3.2**"

Installation

No installation required!

Just double click on the "DropInReviewsPRO.exe" file you found in the downloaded folder to open software.

How To Use

This software is designed to be very easy to use.

All you really have to do is fill in information the way you would do when you are filling out any other form.

Step #1:

Double click icon to open up the software.

Step #2:

Simply follow the instructions in the software filling in the required information as you go.

Step #3

Once, you are done, you can save the HTML code as a text file on your computer, or copy it to your clipboard to edit it.

Step #4

Upload your edited HTML page to your server and link to it. Your page with the Drop In Reviews should now be ACTIVE.

e.g. <http://www.yourdomain.com/salespage.html>

*** If you DO NOT have a server, you can copy the HTML code and paste into any free service e.g. blogger that allows HTML code.*

Drop In Reviews Star Rating Images

The review rating images are hot linked from our server. If you would like to link to them from your own server, just download the images from our server and then link to them using the link below (depends on the rating).

<http://www.yourdomain.com/images/1star.png>

Upload your images, to your server and link to them, editing the URL above. You then have to open up the HTML code, and edit replacing our URL with yours.

**** There is no need to re-size the images, just use as is.**

Additional User Tips

User Tip #1: You can adjust the height and width of your Drop In Slider , it is just a matter of opening up your HTML code and editing the two values for height and width, right in the top of the first section of the stylesheet. **e.g.** *if you want to use longer descriptions or reviews.*

User Tip #2: The time delay for the drop in increases in multiples of 2. Every 2 is equal to an extra 5 seconds, therefore for a 20 second delay enter 8.

User Tip #3: You can adjust the font size of the review headline, just access your HTML and edit the size from within. Remember you have 3 titles so you will have to edit the size in 3 spots.

User Tip #4: The ideal background color is white. If you use any other colors other sections of the reviews, may no longer be visible. In which case you have to open up the HTML code and edit those colors, so they too can be visible.

Have fun with the software! :)
